Appendix B

POPULATION MODELLING EXPLANATORY NOTE

INTRODUCTION

This technical appendix has been produced to clarify the final position towards demographic projections for the Huntingdonshire Local Investment Framework. EDAW have worked with HDC and Cambridgeshire County Council Research Group to arrive at an agreed position to resolve queries around the most appropriate assumptions to make towards population change across the District.

In the Huntingdonshire Local Investment Framework Interim Report issued earlier in the year, we carried out our analysis of social and strategic infrastructure requirements based on the population forecasts generated by Cambridge County Council (CCC) Research Group. These forecasts were generated at the district level and not at a site or sub area level. The projections were based on a number of variables including birth rates, death rates, migration and changes in household size.

EDAW and a number of stakeholders raised queries over the CCC forecasts and the assumptions that were used to generate them. These issues included the district level nature of these projections (not broken down to area specific variations in the projections) but also issues such as the proportion of new homes built which will be occupied by migrants to the area and whether the expected age profiles of new build homes will match the age profile of the existing population.

EDAW therefore carried out additional sensitivity testing analysis to compare against the CCC projections, in order for this discussion to be better informed. This sensitivity testing assessed the direct population impact of the new housing developments by applying assumptions around unit types (based on HDC housing policy) and the associated housing population characteristics (based on our research of ONS figures, CORE data and the Huntingdonshire New Housing Development Survey 2007).

This addition lower geography sensitivity testing work was presented alongside the CCC population projections to HDC and CCC for their consideration. CCC Research group have subsequently presented additional analysis of their own district level population forecasts , demonstrating how the EDAW analysis fits within the district level projections. As will be explained later in this paper the CCC Research Group have concluded that the lower geography assessment of population growth associated directly with new housing development does fit reasonably accurately within their own district level forecasts and therefore do not require any changes to the projections run to date or the infrastructure analysis associated with those population figures.

The remainder of this paper will:

1. Present the CCC Research Group (CCCRG) population figures for Huntingdonshire at the district level.
2. Present the EDAW sensitivity testing work examining the direct population increase (at a spatial level) associated with the types of new homes being planned for the district.

3. Present a short explanation of how CCCRG's district level forecasts accommodate new housing growth, and how this compares to the work carried out by EDAW.
4. Concludes the implications of this EDAW and CCC cooperative analysis and explains the agreed way forward for the Huntingdonshire Local Investment Framework.

If the reader is familiar with this subject and the population analysis undertaken as part of the LIF so far, then one can skip to section 4 of the paper to grasp the key emerging issues and planned way forward.

EXAMINING THE CAMBRIDGESHIRE COUNTY COUNCIL POPULATION PROJECTIONS

Huntingdonshire District Council has commissioned Cambridgeshire County Council (CCC) Research Group to generate the population projections for this framework using the same housing trajectories included within this report. The population model used by the Research Group is an Excel spreadsheet model originally developed by Norfolk County Council and first used in the production of co-ordinated forecasts for the Draft Regional Strategy for East Anglia, 1995-2016. The model is run at a district level; figures for Cambridgeshire are aggregated from the district-level figures.

The main population forecasts are produced by ageing forward the population by sex and single year of age from a base date, year by year. Population change is forecast by allowing for the main components of population change: births and deaths (which together give natural change), and migration.

Births are forecast by applying fertility rates to numbers of women of childbearing age. Age-specific fertility rates are input at the base year. These age-specific fertility rates provide a basic fertility curve that can be adjusted upward or downward according to forecast changes in age-specific fertility. The numbers of births forecast in any year are therefore dependent on the forecast age-specific fertility rate and on the numbers of women in childbearing age groups.

Deaths are forecast by the application of mortality rates to the resident population. Age- and sex-specific mortality rates are input at the base year. These rates provide a basic pattern of mortality that can be varied according to forecast changes in age- and sex-specific mortality rates. The number of deaths forecast in any one year is therefore a product of the sex and age structure of the population and the death rates being applied to the population in that year.

Migration is modelled in two stages. Firstly an age and sex structure of in and out migration is determined and secondly annual totals for the levels of net migration are forecast. The age and sex structure of net migration represents the probability of migrants being of a particular age and sex. This structure is determined for the base year of the model and then fitted to forecast totals of net migration to produce numbers of migrants into or out of an area by sex and age. Net migration is the balance between migration into an area (in-migration) and migration from it (out-migration). The model operates by holding out-migration constant (at 2001 levels) and adjusting in-migration to give the assumed rate of net migration.

The population projection model is obviously more complex than the overarching approach outlined here and incorporates a considerable level of research and variable factors. Further information on these details can be obtained upon request.

Analysis of population projections

Housing growth incorporated into the population projections

The housing figures being assessed by the Local Investment Framework are presented and explained at the beginning of this chapter 5 in the main document. Table B.1 and B.2 below present the housing figures which have been incorporated into the Cambridge County Council Research Groups district level population forecasts for Huntingdonshire. These figures do not however represent summaries of the detailed housing trajectory that has been used by the Local Investment Framework and incorporated into the Infrastructure Delivery Model. The figures in the table below will not match the Local Investment Framework housing trajectories exactly (less than 2% difference) as they represent the figures used by the CCC RG. This difference is minimal and as such the district level population projections can be used within the Local Investment Framework. The low and high Scenarios presented below refer to the alternative housing number options for the land south of Cambridge Road in St Neots. This variation is explained in Chapter 5 of the main document.

Table B.1: Housing Trajectories with St. Neots at Core Strategy level

Scenario 1 – St Neots Lower	2006	2011	2016	2021	2026
Total housing numbers	68,600	72,802	77,602	80,402	80,802
New houses built in 5 year phase		4,202	4,800	2,800	400
Cumulative change from 2006		4,202	9,002	11,802	12,202

Table B.2: Housing Trajectories with St. Neots at maximum capacity

Scenario 2 – St Neots Higher	2006	2011	2016	2021	2026
Total housing numbers	68,600	72,800	77,600	80,400	81,700
New houses built in 5 year phase		4,200	4,800	2,800	1,300
cumulative change from 2006		4,200	9,000	11,800	13,100

Change in household size across the district

The population projections have incorporated a number of assumptions including average household sizes. Table B.3 illustrates the assumed change in average household size in Huntingdonshire up to 2026. As can be seen, this household size reduces considerably between 2006 and 2026. This trend is common across the UK as a result of numerous factors such as the breakdown of traditional married family units, an increase in single parent families and an ageing population.

Table B.3: Anticipated change in average household size 2006-2026

	2006	2011	2016	2021	2026
Average Household Size	2.40	2.33	2.25	2.19	2.16

As will be seen later in this section, the existing population of Huntingdonshire is projected to increase from 2006 to 2026 and to increasingly age at the same time. This increase in population, combined with the ageing population and reduction in household size will therefore increase the number of households in the district as outlined in Tables B.4 and B.5. The cumulative change in the number of households between 2006 and 2026 is between 12,700 and 13,600.

Table B.4: Household Trajectories with St. Neots at Core Strategy level

Scenario 1 – St Neots Lower	2006	2011	2016	2021	2026
Household Numbers	66,500	71,400	76,100	78,800	79,200
New Households in 5 years		4,900	4,700	2,700	400
Cumulative change from 2006		4,900	9,600	12,300	12,700

Table B.5: Household Trajectories with St. Neots at maximum capacity

Scenario 2 – St Neots Higher	2006	2011	2016	2021	2026
Household Numbers	66500	71400	76100	78800	80100
New Households in 5 years		4,900	4,700	2,700	1,300
Cumulative change from 2006		4,900	9,600	12,300	13,600

Natural change across district

As explained earlier in this section, natural population change is the balance between the number of births in the district and the number of deaths. Tables B.6 and B.7 present the assumptions around natural population change used in the district level population projections. As can be seen, the level of natural change reduces by each phase into the future but remains positive (births outnumbering deaths). Scenario 2 appears to differ slightly from Scenario 1 in the final phase, probably as a result of the natural change associated with additional in-migrants resulting from the additional housing development at St Neots. The cumulative natural population change between 2006 and 2026 is between 8,760 and 8,840 people.

Table B.6: Natural Population Change with St. Neots at Core Strategy level

Scenario 1 – St Neots Lower	2006-2011	2011-2016	2016-2021	2021-2026
Births over Deaths	2,740	2,600	2,230	1,190
Cumulative change from 2006	2,740	5,340	7,570	8,760

Table B.7: Natural Population Change with St. Neots at maximum capacity

Scenario 2 – St Neots Higher	2006-2011	2011-2016	2016-2021	2021-2026
Births over Deaths	As above	As above	As above	1,270
Cumulative change from 2006				8,840

Migration change across the district

As explained earlier in this section, net migration is the balance between in-migration and out-migration. Table B.8 and B.9 below present the migration assumptions which have been used in the district level population projections. As can be seen in both scenarios, the district is seen to lose population in the period of 2016 to 2026, but will experience a cumulative in-migration of between 1,450 and 3,700 people between 2006 and 2026.

Table B.8: Cumulative Population Change with migration with St. Neots at Core Strategy level

Scenario 1 – St Neots Lower	2006-2011	2011-2016	2016-2021	2021-2026
Net Migration	3,500	2,000	- 800	- 3,250
Cumulative change from 2006	3,500	5,500	4,700	1,450

Table B.9: Cumulative Population Change with migration with St. Neots at maximum capacity

Scenario 2 – St Neots Higher	2006-2011	2011-2016	2016-2021	2021-2026
Net Migration	As above	As above	As above	- 1,000
Cumulative change from 2006				3,700

Impact on Huntingdonshire total population

As a result of natural change, migration, changing household sizes and the provision of new housing, the total population of Huntingdonshire is projected to increase by between 11,600 and 13,900 people (depending on the two scenarios). As can be seen in Table B.10, under Scenario 1, the District as a whole would appear to lose population between 2021 and 2026 as a result of high levels of out-migration, itself resulting from relatively small number of planned new homes, combined with a natural increase in population and reduction in average household size. This negative shift does not occur in Scenario 2 as a result of the additional new homes planned between 2021 and 2026 (Table B.11).

Table B.10: Anticipated Population Figures and Associated Change with St. Neots at Core Strategy level

Scenario 1 – St Neots Lower	2006	2011	2016	2021	2026
Total Population	160,700	167,400	172,400	174,000	172,300
5 year change		6,700	5,000	1,600	- 1,700
Cumulative change from 2006		6,700	11,700	13,300	11,600

Table B.11: Anticipated Population Figures and Associated Change with St. Neots at maximum capacity

Scenario 2 – St Neots Higher	2006	2011	2016	2021	2026
Total Population	As above	As above	As above	As above	174,600
5 year change					600
Cumulative change from 2006					13,900

Impact on Huntingdonshire age cohort specific population

Table B.12 illustrates the total change in age specific population and illustrates the proportion of Huntingdonshire's total population growth attributable to each age cohort. As can be seen, Huntingdonshire would experience a significant increase in the over 40 year old age cohorts combined with a considerable reduction in the school age and the young professional and working age population.

Table B.12: Total Change in Population by Age Group 2006-2021

	Change from 2006 - 2026	
	Scenario 1 - St Neots Low	Scenario 2 – St Neots High
0-4	- 500	- 300
5-10	- 1,800	- 1,600
11-15	- 2,100	- 2,000
16-19	- 1,400	- 1,300
20-24	- 1,200	- 1,000
25-39	- 1,000	- 200
40-64	700	1,300
65-74	7,500	7,600
>75	11,400	11,400
Total Population	11,600	13,900

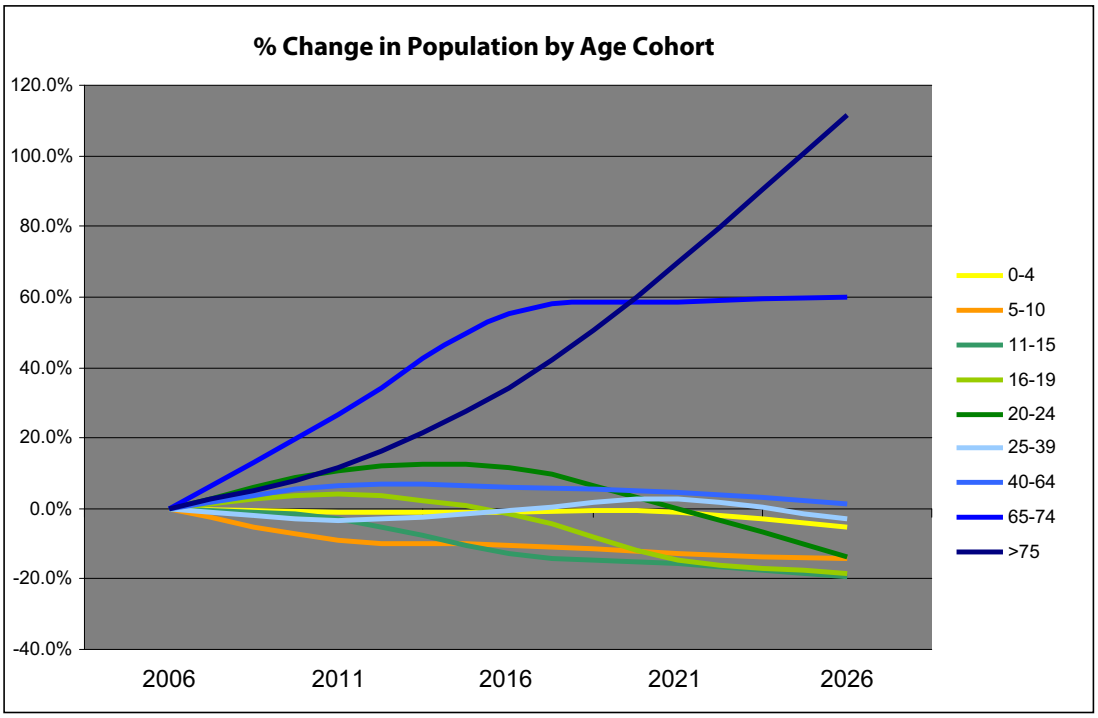
Population ageing is particularly significant in Huntingdonshire as a result of the rapid population growth in the District in the 1970s and 1980s with many young people moving in to new post-war houses. These people are now entering older age over the 2006 to 2026 period. While the Table B.12 illustrated total population change, Table B.13 explains the percentage change in age cohort population between 2006 and 2026.

Table B.13: Percentage Change in Population by Age Group 2006-2026

	Percentage Change from 2006 - 2026	
	Scenario 1 - St Neots Low	Scenario 2 – St Neots High
0-4	-5.4%	-3.3%
5-10	-14.4%	-12.8%
11-15	-19.3%	-18.3%
16-19	-18.4%	-17.1%
20-24	-14.0%	-11.6%
25-39	-3.1%	-0.6%
40-64	1.2%	2.3%
65-74	60.0%	60.8%
>75	111.8%	111.8%
Total Population	7.2%	8.6%

Figure B.1 illustrates the percentage change in age cohort specific population for Scenario 1 (St Neots Low). We have not illustrated Scenario 2 as the graph appears almost identical in appearance. As can be seen, the over 65 year age cohorts will experience considerable growth with the >75 year age cohort more than doubling between 2006 and 2026.

Figure B.1: Graph to show Percentage Change in Population by Age Group 2006-2026



Summary of District Wide Population Change

Put simply, the Cambridgeshire County Council Research Group population projections foresee the existing population growing over time through natural change (births outnumbering deaths). At the same time, the average household size will be falling (partly due to the marked population ageing) and therefore the number of newly forming households generated by the existing population will increase. It is then assumed that a high proportion of the new homes planned for the district will be occupied by this existing (but changing) population. As a result, the assumption toward net migration, the number of in migrants against the number of out-migrants, is that this becomes negative after 2016, with the district effectively exporting people to other areas.

Issues requiring further exploration

The population projections are provided at a district wide level, and do not unpack the projections into those attributable to the existing population and those directly attributable to the building of new housing developments. This is particularly important for us in order to understand the spatial change in demand for services which can be missed when observed from a district level.

Because the population projections are at a district wide level, they do not allow interrogation at a lower geographical level. For example, in relation to school aged children, the projections would suggest that across Huntingdonshire there will be a reduction in the school aged population in the order of three primary schools and one secondary school. The projections do not however illustrate where this reduction may be taking place and could therefore be a universal trend across all schools in the district.

The concentrations of new housing developments proposed in a number of places across the district such as St Neots is likely to result in the need for a new primary school. However, without a better understanding of the origins of new housing development occupants, in terms of either newly forming households from the existing population or in-migrant families, it will be difficult to effectively plan for the negative demand in other areas.

From our analysis of the district level population projections it would appear that planning for social infrastructure across Huntingdonshire will encompass two different dimensions. Firstly the clear aging of population in the existing residents will present a considerable pressure on services such as health and social care for the elderly but also a shrinking demand for services such as childcare and primary and secondary schools in areas not proposed to accommodate housing growth.

Secondly and in contrast to the first, the concentrations of new housing development will potentially attract concentrations of younger, more dynamic and economically active population which will require specific social infrastructure interventions to meet their demand. These will potentially serve both the existing as well as new communities planned and the types of facility requirements will evolve as the new occupants of housing developments mature.

EDAW SENSITIVITY TESTING: DIRECT POPULATION IMPACT OF NEW HOMES

EDAW has carried out a sensitivity exercise where we have modelled our own understanding of new population directly associated with the building of new homes. This has concentrated on three areas which we feel need further exploration:

1. The age profile of new housing developments not simply the total population.
2. The spatial distribution of this population growth rather than simply looking at the district level
3. The proportion of new homes built which actually generate new people in the district and the proportion that are occupied by existing residents.

Methodology:

The following methodology of analysis has been carried out:

- We have taken the latest housing trajectories for all areas of Huntingdonshire
- Researched a theoretical housing tenure and unit size mix for new developments in Huntingdonshire.
- Applied the theoretical housing tenure mix and unit size mix to all units based on best available information from HDC.
- Simplified the housing completions to fit into 4 phases (plus a additional 2021-2026 scenario to allow for the 2nd housing scenario at St Neots)
- Researched the household characteristics (age profiles) of Huntingdonshire new housing developments (in terms of tenure and unit size) using three key sources (the ONS, Core affordable housing data, and the Huntingdonshire New Housing Survey)
- Established average household sizes for different types of properties in the area.
- Established age profiles for different types of properties in the area.
- Applied the average household sizes and age profiles to the phased housing completions (tenure and unit size specific) to generate phased total population figures for the key areas.
- Researched the proportion of new homes which are occupied by people from within Huntingdonshire District (again by tenure) to establish a new home origin proportion.
- Applied the new home origin proportion to market, social rented and intermediate populations to establish the amount of people in the District associated with new homes and new to the district.

We have obviously had to make a number of informed assumptions to fill information gaps where data or decisions have not yet been made. These are explained in more detail below.

Theoretical Housing Mix.

For this theoretical exercise it was necessary to project the type of housing that would be developed in Huntingdonshire in more detail than simply total unit numbers. We therefore wanted to understand the potential tenure mix and unit size mix. With this understanding we then applied the housing mix

To establish a tenure and unit size mix we used the HDC Housing Mix Supplementary Planning Guidance which recommended the following:

"Any proposal for residential development in these categories should contribute to the supply of smaller dwellings by:

- *Providing not less than 40% of all properties with one or two bedrooms*
- *Providing not less than 60% of all properties with one, two or three bedrooms*

In addition to this housing unit size guidance the HDC housing Strategies recommend a target of 40% affordable housing units with a split of 30% intermediate and 70% social rented affordable units.

This translated into the following table of housing assumptions which we have applied to the total unit numbers.

Table B.14: Theoretical Housing Assumptions for sensitivity testing

Tenure of Housing	Tenure Split	Unit Size Mix			
		1 bed	2 bed	3 bed	4 bed
Market	60%	15%	25%	20%	40%
Social rented affordable	28%	15%	25%	20%	40%
Intermediate affordable	12%	15%	25%	20%	40%

Researched Huntingdonshire Household Characteristics:

We have attempted to understand the average household size and age profile for every type of new homes that is developed in Huntingdonshire, tenure and unit size specific. For this research we have analysed three different sources:

1. The Office of National Statistics (ONS) Census 2001. (Relevant to Market units & Social Rented Affordable units). Within this data source we have examined an independently commissioned table which gives an insight into the age profiles of different housing types for newly created households in Huntingdonshire.

2. The CORE (Continuous Recoding) system. (Relevant to Social Rented Affordable and Intermediate Affordable units). This was developed jointly by the National Housing Federation and the Housing Corporation and is used to record information on Registered Social Landlord (RSL) lettings and intermediate houses sales across local authorities including Huntingdonshire District.

3. Huntingdonshire New Housing Development Survey 2007. (Relevant to all types of housing units). While these types of surveys are rare, they examine exactly what this sensitivity testing paper is attempting to assess. Huntingdonshire carried out this survey in 2007 and reviewed the occupants of 8 new housing developments with a range of typologies to understand the household size and details such as the number of children and previous address.

1. The Office of National Statistics (ONS) Census 2001

EDAW understand the reservations that many local authorities and professionals have with the use of the ONS Census 2001. There are a few specific limitations of the Census 2001 such as the surveys being dated (7 – 8 years ago) and the surveys recording of habitable rooms and not bedrooms. However, this data source still represents an invaluable source of information often underestimated, particularly with regard to household profiles.

EDAW have carried out detailed analysis of the independently commissioned ONS Census Table CO511 'Accommodation type for households and Age of persons by Number of rooms by Tenure' (Wholly moving households in unshared dwelling).

As the title suggest, this census tables provide detailed data on all local authorities by the size of households and their age profiles depending on both the tenure of housing but also the housing type (whether houses or flats). Using this set of data, each local authority can have a detailed housing characteristics profile generated.

Table CO511 provides data on all households which have recently moved locations, which could refine our analysis towards new homes rather than mature communities. It should be noted that table CO511 represents all house movers including those moving into existing properties and not specifically new build developments. It should also be noted that 'Market Units' relate to those that are identified in the Census as either owned (owned outright; owned with a mortgage or loan; or paying rent and part mortgage under shared ownership) or are private rented (renting from a private landlord or letting agency; employer of a household member; or relative or friend of a household member or other person). 'Social Rented Units' relate to those in the Census that are either rented from the Council (local authority) or from other social landlords (principally housing associations). The Census data does not enable the user to subdivide these general property types further, and as such should be used as a guide with reference to the 'type' of property and likely occupiers that would reside within them. The table below outlines how the property types presented in the Census tables have been categorised:

Table B.15: Census Tenure Assumptions

Census tables CO549 & CO511 tenure typologies	Tenure Assumptions
Owned	Market Units
Private rented or living rent free	
Rented from council	Social Rented Units
Other Social Rented	

A recognised weakness of the ONS Census is the lack of data collection related to the number of bedrooms in a property and instead the collection of data related to number of 'rooms'. The 2001 Census has captured data for the number of rooms within a dwelling. This measure does, however, differ from traditional measures of habitable rooms and is based upon the number of

rooms available to the household excluding bathrooms, toilets, halls or landings and rooms that can only be used for storage.

For the purposes of this analysis, households with between 1 and 3 rooms are classified as one bedroom units (assuming on balance that extra rooms are kitchens and/or lounge areas), households with 4 rooms have 2 bedrooms, households with 5 or 6 rooms have 3 bedrooms and households with 7 or more rooms have 4 bedrooms (all with assumed separate kitchen and lounge areas).

Table B.16: Census Room to Bedroom assumptions

Census tables CO549 & CO511 Number of rooms* recorded	LMF Assumption on bedroom equivalent
1, 2 or 3 rooms	1 bedroom
4 rooms	2 bedrooms
5 or 6 rooms	3 bedrooms
7 or 8 rooms	4 bedrooms

**Rooms include living rooms, bedroom, kitchens, utility rooms and studies but not bathrooms or storage rooms.*

2. The CORE (Continuous Recoding) system.

The CORE (Continuous Recoding) system was developed jointly by the National Housing Federation and the Housing Corporation and is used to record information on both Registered Social Landlord (RSL) lettings and intermediate new house sales across England. The system was established in 1998 and since 2003/4 Local Authorities have been invited to participate. The system captures detailed data relating to household characteristics, economic status, ethnicity, age composition of residents and can be searched by Local Authority area to provide an overview of the profile of home occupiers.

This source is detailed and continually updated with the latest data and as such provides a sound evidence base of the profile of new occupiers, across a range of different affordable housing typologies. This is its greatest strength. The main disadvantage is that the data obtained is in a similar fashion to the Census, a snapshot in time based upon the occupier's profile, and as such may not truly reflect how the resident profile may mature and change over time.

EDAW have a working relationship with CORE and have acquired the relevant data available for Huntingdonshire. We have reviewed all surveys from 2007/8 back to 2003/4. Each survey includes the number of bedrooms in a unit and the age of each resident. This data source in fact holds considerably more useful data at a household level aside from household size and age profile, such as the occupants previous address (by postcode) which has enabled us to assess the proportion of affordable and intermediate homes occupied by existing residents of the District.

3. Huntingdonshire New Housing Development Survey 2007

New Housing Development Surveys are more commonly being commissioned by local authorities that have experienced considerable housing development

in recent years and as such wish to accurately understand the type of population which is occupying these developments. This is particularly important as the time since the 2001 census was undertaken increases. These housing development surveys concentrate particularly on developments completed in recent years (maybe the last 5 years) and aim to create a database of detailed occupancy profiles. These profiles include the type of property (tenure, unit size etc) in relation to the household characteristics (size, age profile, ethnicity etc.), previous place of residence, and other household activities such as employment and school and other social infrastructure requirements.

As outlined earlier, the Huntingdonshire New Housing Survey was carried out during the summer of 2007, 1710 households, across eight new developments in Huntingdonshire, were surveyed by Huntingdonshire District Council. The aim of the survey was to learn about living in new housing developments in Huntingdonshire, in order to learn lessons and plan services more effectively in future. The results of the survey were analyses and documented by the CCC Research Group. We have used the survey results to look specifically a the average household size, age profile and previous address of all housing types by tenure and unit size.

Establishing a theoretical new development (tenure & unit size specific) average household size and age profile

ONS Source – Market and Social Rented Affordable

Having assessed the data source as described earlier, the following average household size and age profile is suggested for developments within Huntingdonshire:

Table B.17: ONS based assumptions on A.H.S and Age Profiles

ONS CO511	Market Housing				Affordable Social Rented Housing			
Huntingdonshire	1 bed	2 bed	3 bed	4 bed	1 bed	2 bed	3 bed	4 bed

New Housing Survey – Market, Social Rented and Intermediate Affordable

Having assessed the data source as described earlier, the following average household size and age profile is suggested for developments within Huntingdonshire:

Table B.19: New Housing Survey based assumptions on A.H.S and Age Profiles

New Housing Survey	Market Housing			
Huntingdonshire	1 bed	2 bed	3 bed	4 bed
Average Household Size	1.15	1.69	2.38	2.77
Children 0 -15	0.00	0.13	0.51	0.81
Adults 16 +	1.15	1.57	1.87	1.96
Children 0 -15	0%	7%	21%	29%
Adults 16 +	100%	93%	79%	71%

New Housing Survey	Affordable Social Rented Housing			
Huntingdonshire	1 bed	2 bed	3 bed	4 bed
Average Household Size	1.21	2.32	4.00	4.33
Children 0 -15	0.04	0.64	2.00	2.67
Adults 16 +	1.18	1.68	2.00	1.67
Children 0 -15	3%	28%	50%	62%
Adults 16 +	98%	72%	50%	39%

New Housing Survey	Affordable Intermediate Housing			
Huntingdonshire	1 bed	2 bed	3 bed	4 bed
Average Household Size	1.00	2.17	2.75	3.50
Children 0 -15	0.00	1.00	0.75	0.50
Adults 16 +	1.00	1.17	2.00	3.00
Children 0 -15	0%	46%	27%	14%
Adults 16 +	100%	54%	73%	86%

Arriving at an appropriate assumption to model with

We have used a combination of the data presented above in order to arrive at the most appropriate average household size and age profile to use in our modelling.

- Market units – average household size is an average of the ONS and New Housing Survey – with ONS age profile (verified by new housing survey age and adult proportions).
- Social Rented Affordable units – average household size is an average of the Core Data and New Housing Survey – with Core age profile (verified by new housing survey child age and adult proportions).
- Intermediate Affordable units – average household size is an average of the Core Data and New Housing Survey – with Core age profile (not well matched to new housing survey on 2 and 4 beds but is only age profile available to use and intermediate units make up the smallest proportion of units to be modelled).

Table B.20: Summary of chosen household profiles to test housing

Average of sources	Market				Affordable – Social Rented				Affordable - Intermediate			
Huntingdonshire	1 bed	2 bed	3 bed	4 bed	1 bed	2 bed	3 bed	4 bed	1 bed	2 bed	3 bed	4 bed

New home population origin research

In addition to looking at the household characteristics of new homes in Huntingdonshire we have also looked at data which allows us to make assumptions around the proportion of new homes built which are occupied by existing Huntingdonshire residents and new migrants to the district. We have used the following 2 data sources for this purpose:

1. **The Huntingdonshire New Housing Survey 2007** – Market Units

This has allowed us to look at the proportion of new residents who previously lived within Huntingdonshire. We have reduced the sample to look at those developments which are predominantly market properties (with market tenure of more than 80%). We have taken an average across the 5 housing developments used (which represent 84% of all homes included in the survey). The table below presents the results.

Table B.22: Summary of New Housing Survey Household Origins

Origin - New housing Development Survey 2007	Barford road eynesbury	Co-op Farm, Yaxley	Headlands, Fenstanton	Mill Lane, Little Paxton	Pig Lane, St Ives	Average
	Developments with more than 80% units					
Inside Huntingdonshire	49%	35%	51%	33%	47%	**43%**
Outside Huntingdonshire	51%	65%	49%	67%	53%	**57%**
Total	100%	100%	100%	100%	100%	**100%**

2. **Core Data** – Social and Intermediate Affordable Housing

The Core lettings and intermediate new sales surveys include both current postcode and previous postcode for each survey entry. We have pulled out this data for all units surveyed between 2003 and 2008 and simplified this to either within the Huntingdonshire District or outside the district. The table below presents the findings:

Table B.23: Summary of Core Data Household Origins

Core Data 2003 - 08	Social Rented Affordable Units	Intermediate Affordable Units
Inside Huntingdonshire	**91%**	**75%**
Outside Huntingdonshire	**9%**	**25%**
Total	**100%**	**100%**

The combined findings to use in the modeling process are outlined below.

Table B.24: Combined Household Origin Research

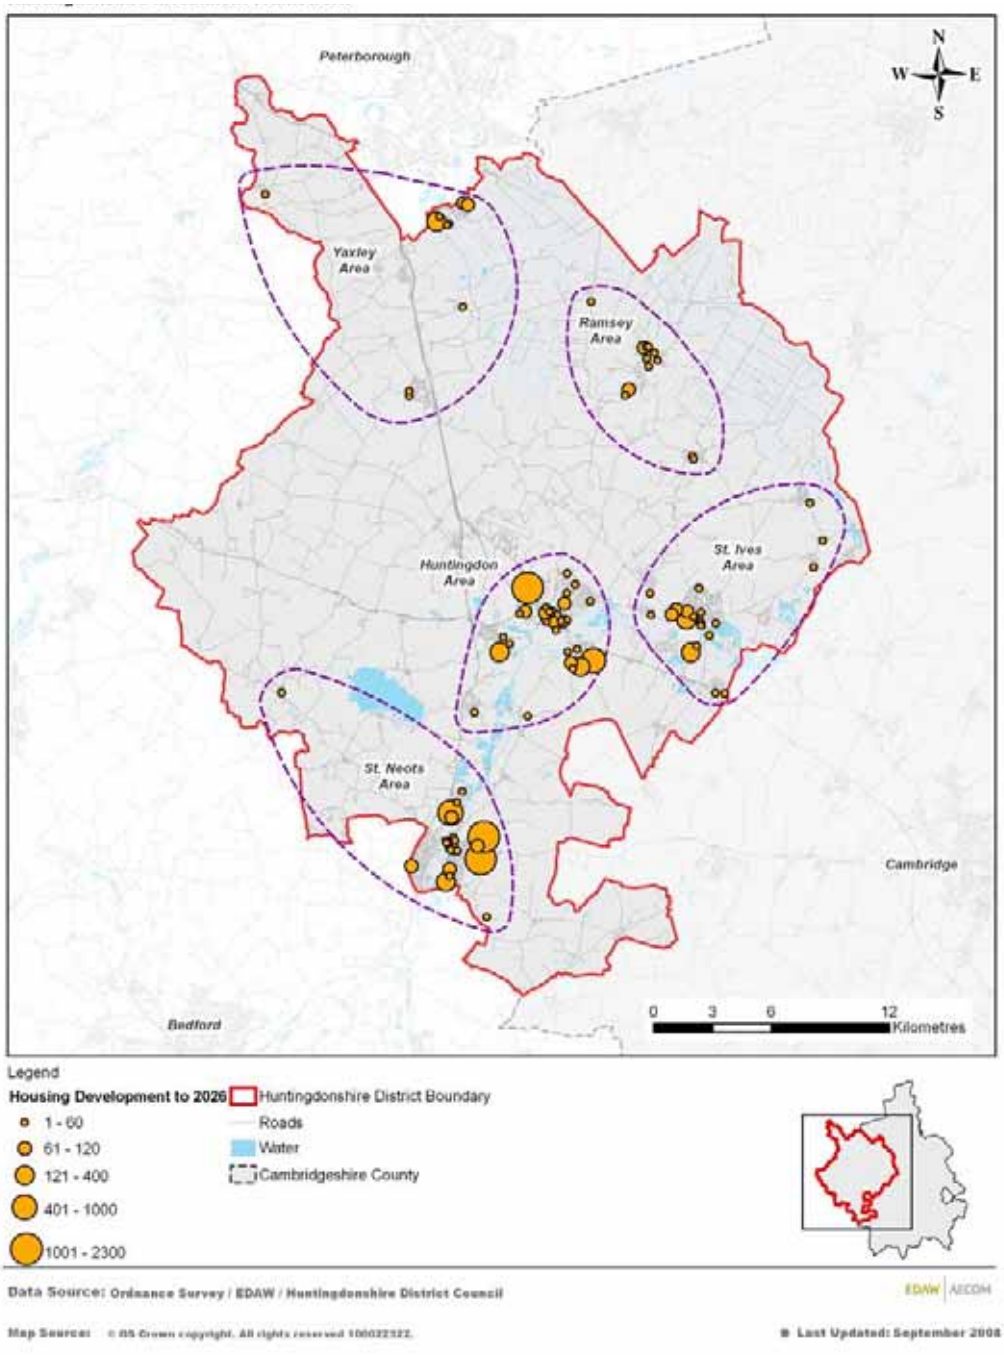
Sensitivity Testing Assumptions	Market Units	Social Rented Affordable Units	Intermediate Affordable Units
Inside Huntingdonshire	**43%**	**91%**	**75%**
Outside Huntingdonshire	**57%**	**9%**	**25%**
Total	**100%**	**100%**	**100%**

Total population associated with planned new homes

For the purposes of the population modelling and social infrastructure assessments we have grouped the housing and associated population into the following 5 Areas (illustrated below) and one non spatial area:

- Huntingdon Area
- Yaxley Area
- Ramsey Area
- St Ives Area
- St Neots Area
- Other small sites aggregated

Figure B.2: Illustrative Map of 5 Analysis Areas to group population impact of potential housing growth to 2026



Having applied the methodology and assumptions outlined in this paper the following population is assumed to occupy the new housing which is proposed for Huntingdonshire over the next 20 years.

Table B.25: Total population occupying potential housing developments

Key New Housing Areas	Total Population in New Homes				
	2011	2016	2021	2026 (low)	2026 (high)
Huntingdon Area	2,430	5,730	8,745	9,332	9,332
Yaxley Area	739	1,159	1,159	1,159	1,159
Ramsey Area	257	989	1,102	1,102	1,102
St Ives Area	939	2,361	3,047	3,122	3,122
St Neots Area	2,341	6,312	12,010	12,460	14,508
other small sites aggregated	1,052	1,579	1,579	1,579	1,579
Total	7,759	18,130	27,642	28,754	30,802

We have then applied the 'New home population origin' research assumptions outlined earlier and this generates the following findings:

Table B.26: Huntingdonshire residents occupying potential housing

Key New Housing Areas	Population likely to originate from **inside** Huntingdonshire				
	2011	2016	2021	2026 (low)	2026 (high)
Huntingdon Area	1,559	3,677	5,611	5,988	5,988
Yaxley Area	474	744	744	744	744
Ramsey Area	165	635	707	707	707
St Ives Area	603	1,515	1,955	2,003	2,003
St Neots Area	1,502	4,050	7,706	7,995	9,309
other small sites aggregated	675	1,013	1,013	1,013	1,013
Total	4,978	11,633	17,736	18,449	19,764

Table B.27: In-migrating population occupying potential housing

Key New Housing Areas	Population likely to originate from **outside** Huntingdonshire				
	2011	2016	2021	2026 (low)	2026 (high)
Huntingdon Area	871	2,054	3,134	3,344	3,344
Yaxley Area	265	415	415	415	415
Ramsey Area	92	354	395	395	395
St Ives Area	337	846	1,092	1,119	1,119
St Neots Area	839	2,262	4,304	4,465	5,199
other small sites aggregated	377	566	566	566	566
Total	2,780	6,497	9,906	10,304	11,038

We have also applied the age profiles across the different housing types and different sites to generate the following age specific new population figures. We are only presenting the total 20 year impact here (2026 position).

Table B.28: Huntingdon Area Age Specific Population in New Homes

FURTHER CCCRG EXAMINATION OF DISTRICT LEVEL PROJECTIONS

Having been presented with the sensitivity testing outputs (as outlined earlier) CCCRG presented additional data from their forecasting model, in order to demonstrate the population change resulting from new housing developments, and to allow this to be compared with EDAW's analysis.

CCCRG also clarified that the County Council model did the following things:

- produced policy led population figures (based on the policy based housing trajectories)
- does not take into account changing demand for housing
- takes into account the significant ageing of population within the district
- takes into account the fact that average household sizes are changing over time and reducing in the case of Huntingdonshire.
- allows for a large inward and outward migration of people with a younger age profile

In order to demonstrate the direct impact of the proposed new homes at the district level the CCCRG have run a special version of their model which has effectively stripped out the proposed housing growth and assumed no new homes would be built over the 20 year period.

Table B.35: CCCRG Population change assuming No LIF Housing Trajectory

Age Cohort	2001	2006	2011	2016	2021	2026	change 2006-2026
0-4	10,100	9,200	8,100	7,100	6,800	6,800	-2,400
5-10'	13,200	12,500	10,600	9,200	8,200	8,000	-4,500
11-15'	10,700	10,900	10,000	8,300	7,400	6,600	-4,300
16-19'	7,100	7,600	7,500	6,600	5,400	4,800	-2,800
20-24	7,400	8,600	8,600	8,200	7,200	6,100	-2,500
25-39	35,600	31,800	26,700	24,000	24,800	25,100	-6,700
40-64	52,700	57,400	58,400	54,800	51,000	47,400	-10,000
65-74	11,000	12,500	15,400	18,500	18,500	18,400	5,900
75+	9,400	10,200	11,200	13,200	16,500	20,500	10,300
Total	157,200	160,700	156,500	149,900	145,800	143,700	**-17,000**
Natural change (5 years)		3,000	2,290	1,210	500	-230	
In migration		37,540	30,250	29,250	32,250	35,000	
out migration		37,250	37,250	37,250	37,250	37,250	
net migration		290	-7,000	-8,000	-5,000	-2,250	

As can be seen from Table B.35 above, this lack of housing growth sees a significant fall in the total population by 17,000 people. The ageing population can be seen from the reduction in natural change and dominance of deaths over births and the net migration can be seen to be negative from 2006 onwards.

These figures need to be compared against the original CCCRG population projections assuming the introduction of housing to the district as set out in the LIF housing trajectory. These are set out below.

Table B.36: CCCRG Population change assuming LIF Housing Trajectory

Age Cohort	2001	2006	2011	2016	2021	2026	change 2006-2026
0-4	10,100	9,200	9,100	9,100	9,100	8,900	-300
5-10'	13,200	12,500	11,400	11,200	10,900	10,900	-1,600
11-15'	10,700	10,900	10,600	9,500	9,200	8,900	-2,000
16-19'	7,100	7,600	7,900	7,500	6,500	6,300	-1,300
20-24	7,400	8,600	9,500	9,600	8,600	7,600	-1,000
25-39	35,600	31,800	30,700	31,600	32,700	31,600	-200
40-64	52,700	57,400	61,000	60,800	59,900	58,700	1,300
65-74	11,000	12,500	15,800	19,400	19,800	20,100	7,600
75+	9,400	10,200	11,400	13,700	17,300	21,600	11,400
Total	157,200	160,700	167,400	172,400	174,000	174,600	**+13,900**
Natural change (5 years)		3,000	2,740	2,600	2,230	1,270	
In migration		37,540	40,750	39,250	36,450	36,250	
out migration		37,250	37,250	37,250	37,250	37,250	
net migration		290	3,500	2,000	-800	-1,000	

As can be seen, the inclusion of the housing trajectories results in an increase in total population from 2006 figures by 13,900 people. In addition the younger age cohorts still experience a negative change but this is far less than the 'No housing' scenario. In addition this increase in younger families in new homes maintains the natural change as positive for longer and the net migration can be seen to remain positive till after 2016.

Therefore it can be assumed that the difference between the two scenarios would indicate the direct impact from building the homes set out in the housing trajectory. This would suggest between 2006 and 2026 the direct impact of building out the housing trajectory would create 30,900 additional people in Huntingdonshire. This is set out in the table below.

Table B.37: CCCRG Population Change related to new dwellings

Age Cohort	Population				
	2006	2011	2016	2021	2026
0-4	0	1,000	2,000	2,300	2,100
5-10'	0	800	2,000	2,700	2,900
11-15'	0	600	1,200	1,800	2,300
16-19'	0	400	900	1,100	1,500
20-24	0	900	1,400	1,400	1,500
25-39	0	4,000	7,600	7,900	6,500
40-64	0	2,600	6,000	8,900	11,300
65-74	0	400	900	1,300	1,700
75+	0	200	500	800	1,100
Total		**10,900**	**22,500**	**28,200**	**30,900**

Referring back to the sensitivity testing work carried out by EDAW and presented earlier in this paper the difference between these 2026 total population figures is negligible. This would therefore suggest that the understanding of population generated by the EDAW work is in line with the wider district level population forecasts. There are some differences between the two sets of numbers with regard to proportions of age cohorts but this is to be expected as the CCCRG model effectively rolls the population forward each year and the population age groups move between cohorts over time.

CONCLUSIONS AND AGREED WAY FORWARD

Having been through this comprehensive analysis of the population projections for Huntingdonshire we are at a point where no further analysis will be undertaken as part of the LIF project. There are some small differences between the district wide CCCRG population forecasts and the findings of the EDAW sensitivity testing exercise but on the bigger picture they are largely complimentary. The CCCRG have commented that there is remarkable agreement between the demographic forecasts produced by the CCCRG and the assumptions made by EDAW to inform the LIF. It is the view of the Research Group that the assumptions made by EDAW are sound and that the new development forecasts (sensitivity testing exercise) EDAW have produced are consistent with their own work.

Conclusions

As explained in details throughout this paper, Huntingdonshire will experience a growth in population over the next 20 years of around **13,800**. If there were no new homes being built the population size would not remain constant but would instead fall quite dramatically and age as well. Instead, because the district is planning to accommodate between 12 and 13 thousand new homes between 2006 and 2026, the population will grow as a total and age to a lesser degree.

It can also be said that as a direct result of those 12 to 13 thousand new homes being built, a population of around **30,800** people will occupy homes in areas of Huntingdonshire which on the majority have not, until they are built, accommodated population. These 30,8 00 people will have come from a number of places:

1. in-migrated into the district from outside the district – this as suggested by the EDAW sensitivity work could be around 11,000 of the 30,000 people,

2. or, moved into the new homes from within the district (domestic migration) and this could as suggested by the EDAW sensitivity testing work could be the remaining 19,800 people, but consists of:
    a. in some cases people moving house leaving an empty property behind (and subsequently attracting further in-migration or domestic migration)
    b. or, in other cases be people forming new households through, for example, leaving home and buying first homes or through families splitting into two from divorce., effectively not leaving an empty home behind but less people (a smaller household)

The difficulty this presents for the Huntingdonshire LIF is that we effectively have comprehensive population projections at a district wide level (which take into account natural change and migration) but we have incomprehensive population projections at the lower geographical level (understanding only the gross change in population associated with new homes but not the natural change and internal external migration of existing homes).

It could be assumed therefore that if the district as a whole will experience a total population increase of around 13,900 people but there will be 30,800

people living in new homes. Therefore somewhere else in Huntingdonshire a population decrease of 17,000 people will occur over the period of 2006 to 2026. This will not mean a reduction in the existing homes but simply a reduction in household size and an aging population. Therefore future infrastructure planning in Huntingdonshire will need to work on two levels:

1. Understand that at a district level the total population will decrease in areas and predominantly in some of the younger age cohorts. Therefore infrastructure rationalisation will be required across some service sectors such as education. At the same time these areas may be also seeing an increase in the older age cohorts and services sectors such as health and social care will need to plan for this. The difficulty here will be predicting spatially where the 'negative population change areas' will be.

2. On the other hand, in areas of new housing growth, predominantly around the key market towns there will be areas of housing accommodating a large increase in population and potentially younger age cohorts which will require infrastructure to service their requirements. This infrastructure may well already exist in that area, underutilised and able to provide a proportion of that infrastructure requirement with its surplus. In other cases however where that is not the case, that infrastructure will need to be provided in its entirety.

The Way Forward for the LIF

The conclusions above present two levels at which infrastructure planning will need to be addressed:

1. For the purpose of assessing the gross level of new infrastructure required in direct relation to the planned housing EDAW will assess (taking into account the likely age profile) the needs of the 30,800 people living in 13,000 new homes across 5 analysis areas (sub areas of Huntingdonshire):

   - Yaxley
   - Ramsey
   - Huntingdon
   - St Ives
   - St Neots
   - + one aggregation of remaining non spatial sites

   This assessment will indicate the infrastructure required to provide for those built new homes. This gross level of infrastructure could as a further exercise (although not within the LIF as this relies on part 2 below) be rationalised down to a net new infrastructure requirement by taking into account the existing infrastructure provision and what capacity this will have in relation to the population change associated with the existing homes within those analysis areas, potentially providing surplus school places for example.

2. In order to understand where reductions or other changes to existing infrastructure provision may be required over time, HDC will need to utilise the ward level CCCRG population forecasts for Huntingdonshire (which

are currently being produced but will not be ready in time for the LIF) which will show the increases and decreases in population over time at a local level rather than simply the district as a whole. These could be aggregated together to match the above 5 analysis areas and a comparison of net change in population and associated infrastructure could be assessed.

Appendix C

SOCIAL INFRASTRUCTURE POLICY REVIEW

PLANNING AND GROWTH

Current National Planning Policy - including PPS1: Sustainable Communities (2006); PPS3: Housing (2006); and Sustainable Communities Plan (2003) – promote the creation of sustainable communities bringing in high quality and inclusive design to create well-mixed and integrated developments with good access to jobs, key services and infrastructure.

Furthermore, in relation to the delivery of such services and infrastructure, Rethinking Service Delivery: Volume Three, Shared Service and Private/Public Partnerships (2006) discusses service providers promoting economies of scale through partnerships.

In determining the allocation and release of land for housing development, PPS3 focuses on:

- the availability of sites, whether it is currently available or within five years;
- the suitability of sites, whether they offer a sustainable options for the creation of sustainable communities; and
- the economical viability of housing developments.

The East of England Plan (2008) includes the appropriate provision of affordable housing and social infrastructure within its overarching objectives. The plan states that at least 30% of housing growth by 2021 should be affordable, rising to 40% where possible. The plan also states that social infrastructure delivery should be coordinated with new development and local development documents must consider the land use needs of health, education, recreation and social services.

The plan states the East of England Regional Assembly will seek priority investment for the following:

- support for all forms of affordable housing;
- social infrastructure to underpin economic growth and regeneration
- transport infrastructure;
- delivery mechanisms needed to achieve employment growth underpinning the spatial strategy.

The Panel recommends that an additional 27,500 dwellings be provided, to a new total of 505,500 by 2021. The additional growth suggested in Huntingdonshire remains constant at 11,200. The Panel agrees with the importance of affordable housing and provides 35% as the level to which local authorities should aspire; however, this is provided as a guide and some flexibility is accepted where necessary.

The Cambridgeshire and Peterborough Structure Plan includes several policies that relate to the provision of social infrastructure, as shown below:

Policy	Social Infrastructure Policy Requirements
Policy P6/1	Development will only be permitted where provision of the infrastructure and community requirements needed as a result of the proposal can be secured.
Policy P9/8	Within the Cambridge Sub-Region, permission for development is contingent on the additional needed infrastructure being provided.

Source: Cambridgeshire and Peterborough Structure Plan

Provision for community facilities and infrastructure is also given consideration in the Cambridgeshire Programme of Development for Housing Growth Funding (PoD). This document discusses the need of the Market Towns to address their problems of under-performing town centres and lack of appropriate social facilities and related infrastructure. It also claims they need to develop their physical, economic, social and green infrastructure in order to accommodate growth. Additionally, the key projects within the Market Towns have a goal of improving essential community infrastructure and build greater community understanding of sustainable development issues.

The Balanced and Mixed Communities: a Good Practice Guide recognises the importance of community facilities and social infrastructure, but also stresses the importance of managing these facilities. The local community is considered important in both the choosing and managing of facilities, and Community Trusts were identified as a mechanism for this. Early provision of community facilities is also seen as important for establishing the credibility of new communities.

The Cambridge Sub-Region Long Term Delivery Plan Final Report provides a strategy for dealing with the 'up-front' infrastructure requirements through a Rolling Fund. This strategy calls for Government investment in up-front infrastructure being recycled into the Rolling Fund for further investment using value captured from development through s.106 agreements and other income.

The Huntingdonshire Community Strategy sets out a number of priorities and actions that the different actors involved will seek to accomplish. The priorities provided in the strategy are:

- a sustainable, buoyant and balanced local economy;
- improved and sustainable infrastructure for communities
- a healthy population;
- easy and affordable access to services and facilities;
- good cultural and leisure opportunities;
- vibrant, confident and effective communities;
- a high quality built and natural environment;
- low crime;
- low fear of crime.

Joint service provision is an important theme throughout this document. The strategy aims to increase the provision of community facilities from joint

working as well as support the Sub-regional Infrastructure partnership. Additionally, it promotes community-based services and demand responsive services. The strategy also suggests the development of extended schools, the development of HELP (ICT learning points) and the enhancement of village halls so that they provide more facilities and services.

The Huntingdonshire Council Local Development Framework - Core Strategy (2008) names Huntingdon, St Ives and St Neots as the areas where most new growth will occur. This new growth will require new infrastructure and the timely provision of this is discussed in the strategy.

The preferred approach to the policy relating to the provision of infrastructure is provided in Preferred Options Volume One. It states that proposals for development will be expected to provide or contribute towards the cost of providing appropriate infrastructure, and of meeting social and environmental requirements, where these are necessary to make the development acceptable in planning terms. Contributions may also be required to meet the management and maintenance of services and facilities provided through an obligation. The following are key social infrastructure and housing areas where contributions may be required:

- affordable and key worker housing;
- open space and recreation (including leisure and sports facilities);
- strategic green infrastructure;
- transport (including footpaths, bridleways, cycleways, highways, public transport, car parks and travel
- planning);
- community facilities (including meeting halls, youth activities, play facilities, library and information
- services, cultural facilities and places of worship);
- education, health and social care and community safety;
- utilities infrastructure and renewable energy;
- emergency and essential services;
- environmental improvements;
- drainage / flood prevention and protection;
- waste recycling facilities; and
- public art, heritage and archaeology.

CHILDREN, YOUNG PEOPLE, EDUCATION AND LEARNING

The Government has a vision to increase the access, quality and range of childcare and is committed to delivering a Sure Start Children's Centre for every community by 2010. Additionally, the Government's Extended Schools policy, further promoted through the White Paper on Education1, aims to maximise the potential of schools and their community settings by providing a range of services and activities outside of the statutory school day to serve pupils, their families and the wider community; including the co-location of social infrastructure provision and incorporating flexibility for future expansion (or restructuring) to meet the changing needs of future populations.

[1] 'Higher Standards, Better Schools for All: More Choice for Parents and Pupils' (DfES, October 2005)

According to the SureStart Children's Centre Practice Guidance, local authority or NHS services should offer all families with children under 5:

- free early years provision (integrated early education and care) for 12.5 hours a week, 38 weeks a year for 3 and 4 year olds rising to 15 hours a week by 2010; and
- information and access to childcare in the local area.

The Guidance also states that it is essential for local authorities and health colleagues to work together to plan, share data and deliver services through children's centres. In talking to health colleagues and Primary Care Trusts, children's centres should emphasise ways in which they can help meet healthcare priorities and targets. In some cases health centres will be a good location to develop children's centres. Furthermore, schools may be an obvious option for co-location of a children's centre. Under such a model, the children's centre can play a wider role in the delivery of extended services for the whole school population.

In relation to the physical provision of Children's Centres, the Guidance states that first and foremost, early years provision must be safe for children and appropriate to their needs. Careful consideration should be given to the creation of spaces which facilitate early years provision for the various age groups.

The ideal area is multi-functional and can accommodate specific needs: a quiet space for younger children to rest, for example. The space should also encourage accessibility for all and promote the inclusion of disabled children.

To ensure child equality for all, the Government has also set out a vision for childcare2 and children and young people's services3 including:

- joined up services;
- community Children's Centres providing an integrated service of information, health, family support, childcare and more;
- child and adolescent mental health services (CAMHS) in every area by 2006; and
- by 2010, out of school childcare places between 8am and 6pm available every weekday for all children from the ages of 3-14.

Furthermore, the DfES has published a Five Year Strategy for Children and Learners4 which focuses on step changes in children's services, education and training to improve provision, including:

- flexible 'educare' that unites education and childcare while providing 12 ½ hours free support per week for children aged 3-4 years;
- dawn to dusk schools providing breakfast and homework clubs;
- refurbishment or rebuilding of every secondary school over the next 10 to 15 years;

[2] Ten Year Strategy for Childcare 'Choice for Parents, the Best Start for Children' (December 2004)

[3] Every Child Matters (September 2003)

[4] Putting People at the Heart of Public Services (Department for Education and Skills, July 2004)

- freedom of all secondary schools to have control of all their assets; and
- additional space in popular schools through capital funding.

The Education Planning in Cambridgeshire: School Organisation Plan Outlook for 2006-2011 document operates under 11 core principles which focus on safety, access, inclusion and the important role of family and community. The plan also discusses the importance of extended schools provision, a diverse provision of denominational schools, and the development of Children's Centres.

The plan describes the principles to be used when developing new schools within Cambridgeshire, which are as follows:

Key Education Development Principles
1. High quality childcare to be available to families in the local area;
2. High quality early years education to be available in the local area for children aged 3 and above;
3. Where possible, no child of primary school age to have to travel more than 2 miles (the statutory walking distance) to get to school;
4. Where possible, no child of secondary school age to have to travel more than 3 miles (the statutory walking distance) to get to school;
5. Primary schools to serve the 5-11 age range (all-through primary provision);
6. Primary schools to be inclusive of children and adults with special educational needs with a preference for general teaching accommodation to be located on the ground floor;
7. Each primary school to have a dedicated space for community use/activities, if this is the agreed model with the appropriate district council for delivering these services;
8. Primary schools to be a maximum size of 420 places with an intake of 60 pupils each year (2 forms of entry);
9. Services for children and families to be focused around schools;
10. Where considered to be the appropriate pattern of provision by other providers, leisure and community education/lifelong learning can be co-located with secondary schools;
11. School sites to be chosen on the basis of their capacity and suitability for development and for promoting community cohesion and of walking and cycling;
12. Each school to have a defined catchment area.

Source: Education Planning in Cambridgeshire: School Organisation Plan Outlook for 2006-2011

The plan also discusses amalgamation, collaboration and federation. The Authority will support collaboration and is considering establishing its new/replacement secondary schools as part of a federation.

Furthermore, the plan provides the following information about planned new and enhanced schools within Cambridgeshire:

New / Replacement Education Facilities
1. One new primary school in Huntingdon;
2. One new primary school in St Neots;
3. Redeveloped school on the Great Gidding Primary School site;
4. Substantial improvements to Longsands Community College.

Source: Education Planning in Cambridgeshire: School Organisation Plan Outlook for 2006-2011

The Big Plan: Cambridgeshire's Children and Young People's Plan 2006-2009 addresses a wide range of needs and issues faced by children and young people. It calls for ensuring that facilities for children and young people be developed alongside new communities by securing sufficient childcare, early years, primary, secondary school and post-16 places to meet anticipated demand; providing facilities for recreational and social needs of young people; and developing services appropriate for the diverse needs of the community.

Another important theme throughout The Big Plan is the development of early years and extended services. Additionally, the plan states that the use of technology will increase accessibility and deliver an ICT strategy. All of the services will be delivered at the level most local to children and young people and will improve throughout all communities.

In order to improve the transitions between learning centres (from early years to employment) the plan promotes the development of direct youth work in school, provision of home to school liaison, and support of children's centres and extended services that create clusters of early years settings and schools. Phase 2 of their Children's Centre programme has delivered 22 children's centres in Cambridgeshire that work with partners to deliver these services through schools, community health centres and other community locations. This was completed in August 2008 and is now being followed by the delivery of 13 more Children's Centres in Cambridgeshire by March 2010. New facilities in Huntingdonshire will include facilities in Little Paxton and Sawtry, as well as one facility in Huntingdon/Stukeley (location to be confirmed). These are not expected to affect capacity.

According to Cambridgeshire County Council the following schools are being redeveloped, or refurbished:

- Huntingdon Infant School – amalgamating with Huntingdon Junior School to hopefully reduce spare capacity;

- Winhills Primary Schools has recently had a Children's Centre added on site, reducing capacity by 30 places;

HEALTH AND SOCIAL CARE

Health and Social Care is a large subject area covering numerous sub elements including GP surgeries, healthcare centres, dentists, pharmacies, optometrists, hospitals, care homes and day care centres.

Healthcare facilities can play a central role in creating social and economic regeneration – building healthy cohesive communities of the future and linking existing residents with new arrivals. It is the responsibility of local authorities to ensure that adequate land is safeguarded for the provision of health and social care with the local healthcare authorities and Primary Care Trusts (PCTs) being responsible for bringing these sites into active use.

The NHS Plan: A Plan for Investment. A Plan for Reform (Department of Health; 2000) states a vision to create a more patient-centred service located and delivered at times and locations convenient to its patients. The broad objectives expressed in relation to healthcare are to improve primary care premises across England particularly within deprived areas.

It is expected that the NHS investment and reform programme will undoubtedly lead to changes in the nature and location of service delivery and have land use implications.

Health policy at a regional or Strategic Health Authority (SHA) level also promotes a significant expansion in the range of primary care and community facilities, as shown below:

Key Healthcare Development Principles
1. The One Stop Primary Care Centre (OSPCC) is the core of the basic primary care model and incorporates core GP, specialist local health services and community outreach, potentially also incorporating activities such as dentistry and pharmacies.
2. Primary care and community facilities are also being promoted at the regional level through Primary Care Diagnostic and Treatment Centres (PCDTCs) which combine the above facilities with outpatient, clinical and diagnostic services, offering walk-in and minor treatment.
3. Similar to other social infrastructure providers, health policies promote the combining of health facilities with other community facilities where possible. For example, 'healthy living centres' combine educational, health and community services.

The Government's Green Paper: Independence, Well-being and Choice (2005), promotes streamlining assessments between agencies and promoting a more flexible approach to putting together core packages using the wider resources of the community. A Care Service Improvement Partnership has

also been established to provide support in the consideration of how services can be redesigned and refocused to provide the outcomes identified.

The Our Health, Our Care, Our Say: A New Direction for Community Services White Paper (Department of Health, 2005) sets out a vision to provide people with good quality social care and NHS services in the communities where they live. This paper sets a new direction for the whole health and social care system and confirms the vision set out in the Green Paper: Independence, Well-being and Choice. The Paper promotes a radical and sustained shift in the way in which services are delivered, ensuring that they are more personalised, easy to access and community based.

The Annual Public Health Report 2007 clearly recognises the importance of social infrastructure and recommends that it be given consideration throughout new developments. The Primary Care Trust already works in conjunction with Cambridgeshire Horizons and the planning authorities in order to ensure the health considerations and infrastructure requirements of population growth and new developments are met. Additionally, the report calls for increased attention to social cohesion which will work to increase health and well-being in communities.

The Cambridgeshire and Peterborough Population Growth and Capacity Planning for Health and Social Care, Second Edition pays particular attention to the changes in provision of services which will occur due to their Closer to Home scenario, where outpatient services will likely face a shift away from acute services toward community and primary care settings. This will happen with the creation of new General Practitioners with Special Interests. The document also sees an overall increase in elective admission, which will be focussed in day case admissions.

Within Huntingdonshire the document sees an increase in the demand for services for older people. Even with the shift in service delivery and reduction in length of stay, bed requirements will, at best, remain stable to 2021. Additional primary and community care facilities will also see an increase and demand. With much of the population growth occurring around St Neots and Huntingdon, these areas should be considered for the provision of the new facilities.

The Cambridge Sub-Region Long Term Delivery Plan Final Report provides a number of challenges facing the area regarding healthcare. One challenge is the creation of delivery systems such as integrated health and social care, contract networks of services, joint ventures and new organisational types. Additionally, attention is paid to restructuring hospital services, protecting essential local services within a challenge financial framework, operating within the commissioning environment and direct providers and operating within the LAA and CAA environment with local authorities.

COMMUNITY, LEISURE, RECREATION AND OPEN SPACE

Sport and recreation is an important part of local community life with clear recognised benefits across other social infrastructure themes, such as improving general health and well-being. The Urban White Paper: Our Towns and Cities: the Future. Delivering an Urban Renaissance (2000; DETR) acknowledges the importance of culture, leisure and sport as important components of our quality of life and as economic sectors in their own right.

In fact, sports and recreation facilities can assist in creating sustainable communities and sports facilities can make an important contribution to the physical infrastructure of communities, providing a social focus and positively influencing people's perception of their neighbourhood.

Planning Policy Guidance 17: Sports and Recreation (PPG17; ODPM, 2002) outlines the use of planning obligations to secure sports and recreation facilities to meet the requirements of new residential communities. The Government recognises the importance of open space, sports and recreation facilities in meeting objectives, including:

- Supporting an urban renaissance: Local networks of high quality and well managed and maintained open spaces, sports and recreational facilities help create urban environments that are attractive, clean and safe. Green spaces in urban areas perform vital functions as areas for nature conservation and biodiversity and by acting as 'green lungs' can assist in meeting objectives to improve air quality;
- Promotion of social inclusion and community cohesion: Well planned and maintained open spaces and good quality sports and recreational facilities can play a major part in improving peoples' sense of well being in the place they live. As a focal point for community activities, they can bring together members of deprived communities and provide opportunities for social interaction;
- Health and well being: Open spaces, sports and recreational facilities have a vital role to play in promoting healthy living and preventing illness. They aid the social development of children of all ages through play, sporting activities and interaction with others; and
- Promoting more sustainable development: By ensuring that open space, sports and recreational facilities (particularly in urban areas) are easily accessible by walking and cycling. More heavily used or intensive sports and recreational facilities should be planned for locations well-served by public transport.

Priorities established by Sport England for the future provision of sport[5] include:

- Preventing the loss of facilities or natural resources or replacing equivalently, or better, in a suitable location;
- Current and future demand for local, quality playing fields must be met (ie. no loss in supply);

[5] Sport England's Interim Statement for Planning for Sport and Active Recreation: Objectives and Opportunities (2005) based on Land Use Planning Policies for Sport (1999)

- Shared use sites will be promoted to increase provision in appropriate locations;
- The urban fringe will be utilised for sporting opportunities requiring larger areas such as golf courses and pitches and for built facilities which helps to maintain the identity of this resource;
- Participation in Community Forests will be supported, as well as use of other woodlands near to major population centres; and
- Floodlit synthetic turf pitches and hard-surfaced multi-use games areas will be promoted as an integral part of community sports provision.

It should also be noted that many existing leisure centres in Huntingdonshire are dual use (school and community) which restricts their availability for public use and the level of future demand may therefore increase if future facilities are also adopted as dual use.

The Cambridgeshire Programme of Development for Housing Growth Funding (PoD) includes the following planned projects that affect open space, recreation and leisure in Huntingdonshire:

Planned Leisure / Recreation Projects
1. St Neots Strategic Green Infrastructure and Access - improves green infrastructure provision and public access in order to accommodate new and future demand due to growth.
2. Huntingdon Olympic Gym - develops a new community building and improves current facilities to support competition at a high level.
3. Grafham Water Sport Facilities - improves existing facilities to include accommodation with access for disabled people, a new training lounge and improved dining and changing facilities.

Source: Cambridgeshire Programme of Development for Housing Growth Funding

The Sports Facilities Standards Report (2008) illustrates the current supply and demand analysis for Huntingdonshire, based on a national model which identifies the recommended provision for the current population, and identifies the following:

- A current deficit of 5.1 swimming pools (4 x 25m lanes each);
- A current deficit of 8 sports halls for badminton (based on 4 courts per sports hall);
- A current surplus of 5 indoor bowls rinks;
- A current deficit of 3 All weather turf pitches (ATPs).

The local standards for future sports facility provision adopted by Huntingdonshire District Council are used in this report and should help address the current surpluses and deficits identified above.

Cambridgeshire Horizons' Green Infrastructure Strategy lists 6 strategic objectives that underpin the strategy. These strategic objectives are:

- connectivity of habitats;
- multi-functionality;
- extended access;
- landscape enhancement;
- biodiversity enhancement;
- landmark projects.

Additionally, the strategy states that planning conditions may be used where consistent with planning policy. The strategy also suggests Authorities consider how to contribute to projects and recommends that on new project in each local authority within the first three years should be a target in order to guarantee momentum and delivery of the strategy.

Included within the Huntingdonshire District Council Core Strategy (2008) are several areas identified for enhancement. These areas include the Ouse Valley from St Neots to Earith, the woodlands around Grafham Water and Brampton, and the wetland and woodlands of the Great Fen Project. The areas around Huntingdon and St Neots will need particular enhancement and protection in face of the proposed growth within those areas.

The Big Plan: Cambridgeshire's Children and Young People's Plan 2006-2009 has a number of recommendations involving physical play and sport opportunities for children. It plans to implement the Play Strategy by disseminating guidance, appointing a county co-ordinator, and developing open green spaces and facilities for young people. Additionally, the plan aims to develop and implement its sports and arts strategy, 'Children and Culture', through the creation of a physical activity strategy for each district; encouraging the voluntary and community sector to deliver sports, arts and cultural activities; integrating children and young people's activities with Cambridgeshire's preparations for the 2012 Olympics; and securing support for an entitlement in arts and sports for all children.

The Open Space, Sport and Recreation Needs Assessment and Audit provides Huntingdonshire Council with recommended standards for a variety of open, green and recreation spaces. The report undertakes analysis of existing local and national standards, existing provision, benchmark standards and consultation to develop the following quantity and accessibility standards:

Open Space Policy Requirements
1. Parks and Gardens – 0.48 ha. per 1,000; 15 minutes walk or 720 metres;
2. Natural and Semi-natural – 0.23 ha. per 1,000; 15 minute walk or 720 metres;
3. Amenity Greenspace – 1.09 ha. per 1,000; 10 minute walk or 480 metres;
4. Provision for Children – 0.8 facilities per 1,000; 10 minute walk or 480 metres;
5. Provision for Young People – 0.8 facilities per 1,000; 15 minute walk or 720 metres;
6. Outdoor Sports Facilities – 1.61 ha. per 1,000; 15 minute walk for grass pitches and tennis courts or 720 metres, 15 minute drive for STP's and bowling greens;
7. Allotments – 0.32 ha. per 1,000; 15 minute walk or 720 metres.

EMERGENCY AND ESSENTIAL SERVICES

The recent government White Paper, Building Communities, Beating Crime – A Better Police Service for the 21st Century (Home Office, 2004) sets out the following key objectives for the police service in the 21st century:

Key Police Development Principles
1. The spread of neighbourhood policing […] to every community with improved police responsiveness and customer service;
2. Further modernisation of the police workforce to ensure that the service delivery is fully equipped and able to deliver these changes;
3. Greater involvement of communities and citizens in determining how their communities are policed;

Source: Building Communities, Beating Crime – A Better Police Service for the 21st Century

Recent policy guidance also advocates a move towards a more visible, accessible police presence on the streets and within communities, thus enabling the police to respond more rapidly to situations.

'Policing Contributions from Development Schemes is a document by the ACPO Eastern Region that recognises the importance of providing adequate policing resources and states that it has an essential role to play in the delivery of safe, health and attractive places to live. It notes that the high level of

growth set out in the emerging East of England Plan will significantly increase the demands on police resources, which manifest themselves in a variety of forms dependent on the nature of the proposed development, including:

- The need to acquire land and the capital costs of Police buildings and associated facilities for the provision of new Police Stations;
- Extend existing Police Stations;
- Replace temporary with permanent accommodation;
- Provide new vehicles and other resources to police new developments;
- Extend existing communication infrastructure;
- Crime reduction measures in line with 'Secured by Design' Principles.

The Fire Service is going through significant change with the Government White Paper Our Fire and Rescue Service 2003:

Key Fire Development Principle
1. Embed fire prevention in local community life, potentially through the provision of community fire stations.

Appendix E

SOCIAL INFRASTRUCTURE DATA SOURCES AND VALIDATORS

SOCIAL INFRASTRUCTURE DATA SOURCES

Table E.1 sets out the data sources used to map existing infrastructure in the Social Infrastructure analysis:

Table E.1: Data Sources for Social Infrastructure

Type of Service	Source
Education Facilities	
Early Years	National Statistics Tables
Primary Schools	National Statistics Tables; Department for Children, Schools and Families
Secondary Schools	National Statistics Tables; Department for Children, Schools and Families
Health & Social Care Services & Facilities	
GP Surgeries	Cambridgeshire Primary Care Trust
Dental Surgeries	Cambridgeshire Primary Care Trust
Opticians	National Statistics Tables
Pharmacies	National Statistics Tables
Leisure & Recreation Facilities	
Leisure Centres	Huntingdonshire District Council
Community Facilities	
Community Facilities	Huntingdonshire District Council
Libraries	Huntingdonshire District Council
Open Space	
Play Areas	Huntingdonshire District Council
Allotments	Huntingdonshire District Council
Informal Open Space	Huntingdonshire District Council
Formal Open Space	Huntingdonshire District Council
Essential and Emergency Services	
Police Stations	Cambridgeshire Police Constabulary
Fire Stations	Cambridgeshire Fire and Rescue Service
Ambulance Stations	East Of England Ambulance Service NHS Trust

SOCIAL INFRASTRUCTURE STANDARDS

Table E.2 sets out the standards used in the Social Infrastructure analysis. Where there is no local or national standard an equivalent from a nearby location is used:

Table E.2: Standards for Social Infrastructure

Type of Service	Standard	Source
Health & Social Care Services & Facilities		
General Practitioners	1 per 1,800 persons *	National Health Service
Dental Surgeons	1 per 2,000 persons	Traffic light maps of dentists distribution in England and Wales, 2004
One Stop Primary Care Centre	83.3sq.m per 1,000 persons	Newham Strategic Services Delivery Plan
Acute Healthcare Beds	1 per 480 persons	Thames Valley Health Authority
Other Healthcare Beds (incl. Mental	1 per 1,430 persons	Thames Valley Health Authority
Leisure & Recreation Facilities		
Swimming Pool 25m. 4 lanes. 1 lane = 53.122 sq. m)	0.011 sq. m per person *(10.96 sq.m per 1,000 people)*	Sports Facilities Standards Reports 2007-2020, March 2008
Sports Hall (4 badminton court. 1 court = 170 sq.m)	0.0512 sq. m per person *(51.20 sq.m per 1000 people)*	Sports Facilities Standards Reports 2007-2020, March 2008
Artificial Turf Pitch (ATP). 1 ATP = 6,400 sq.m)	0.246sq m per person *(0.04 ATPs / 256 sq.m per 1000 people)*	Sports Facilities Standards Reports 2007-2020, March 2008
Indoor Bowls Rink. 6 rinks per hall.	0.00006 rinks per person *(0.05 rinks per 1,000 people)*	Sports Facilities Standards Reports 2007-2020, March 2008
Community Facilities		
Community Space	61sq.m per 1,000 persons	Milton Keynes SPG – Social Infrastructure Works
Library Space	26.5sq.m per 1,000 persons	Kent Department for Culture, Media and Sport, 2000

Open Space Requirements		
Outdoor Sports pitches, courts and greens	16.1 sq.m per person , of which: - at least 8.1 sq.m per resident available for community use	Huntingdonshire Local Development Framework, Development Control Policies – Preferred Options 2008
Informal open space	18 sq.m per person of which: - 4.8 sq.m per resident for parks and gardens - 2.3 sq.m per resident for natural and semi-natural open space - 10.9 sq.m per resident for amenity greenspace (excluding domestic gardens)	Huntingdonshire Local Development Framework, Development Control Policies – Preferred Options 2008
Children and young people's play space	8 sq.m per person, which should be provided either within the 'informal open space' or 'outdoor sports pitches, courts and greens' standards of provision.	Huntingdonshire Local Development Framework, Development Control Policies – Preferred Options 2008
Allotments	3.2 sq.m per person	Huntingdonshire Local Development Framework, Development Control Policies – Preferred Options 2008
Emergency Services		
Number of Police Officers	1 officer per 413 persons	The Home Office – 2006/07 (Huntingdonshire Specific)
Associated Floorspace	20 sq.m per 1,000 persons	Costing the Infrastructure of the SE Counties – Roger Tym & Partners
Fire Stations (2 appliance station)	Three appliance station per 64,000 persons	Costs to Social Infrastructure Works in the LTG, 2003
Ambulance emergency calls per year	8 residents per additional call	London Ambulance Service

*Whilst 1,800 patients per GP WTE (Whole Time Equivalent) is the standard used to guide the optimum GP to Patient ratio, it is recognised that this is becoming increasingly difficult to use as a comparator or measure of GP capacity. Each GP practice is free to decide its own establishment and some make greater use of Nurse Practitioners and other professionals such as Clinical Pharmacists.

Appendix G

INFRASTRUCTURE COST ASSUMPTIONS

BASIS OF COST ESTIMATES

The general comment applicable to all of Gardiner & Theobald's building-type costings within this study is that these are construction costs only, with a base date of fourth quarter 2008.

The usual exclusions apply which are: -

- Inflation beyond 4th quarter '08
- Legal fees
- Planning and building regulation fees
- Professional fees
- VAT, SDLT and other taxes / levies
- Investigations and surveys
- Tenants' costs and contributions
- Client fit out (with the exception of ICT & FFE to schools)
- Archaeological works
- Site acquisition fees / costs
- Adjoining owner costs
- Client's insurances
- Client's contingencies
- Contributions to environmental improvements
- Marketing costs
- Finance costs
- Site clearance and demolition
- Abnormal ground conditions
- Asbestos removal
- Artwork
- Infrastructure improvements

Main contractor's preliminaries, overheads and profit are included in the costs.

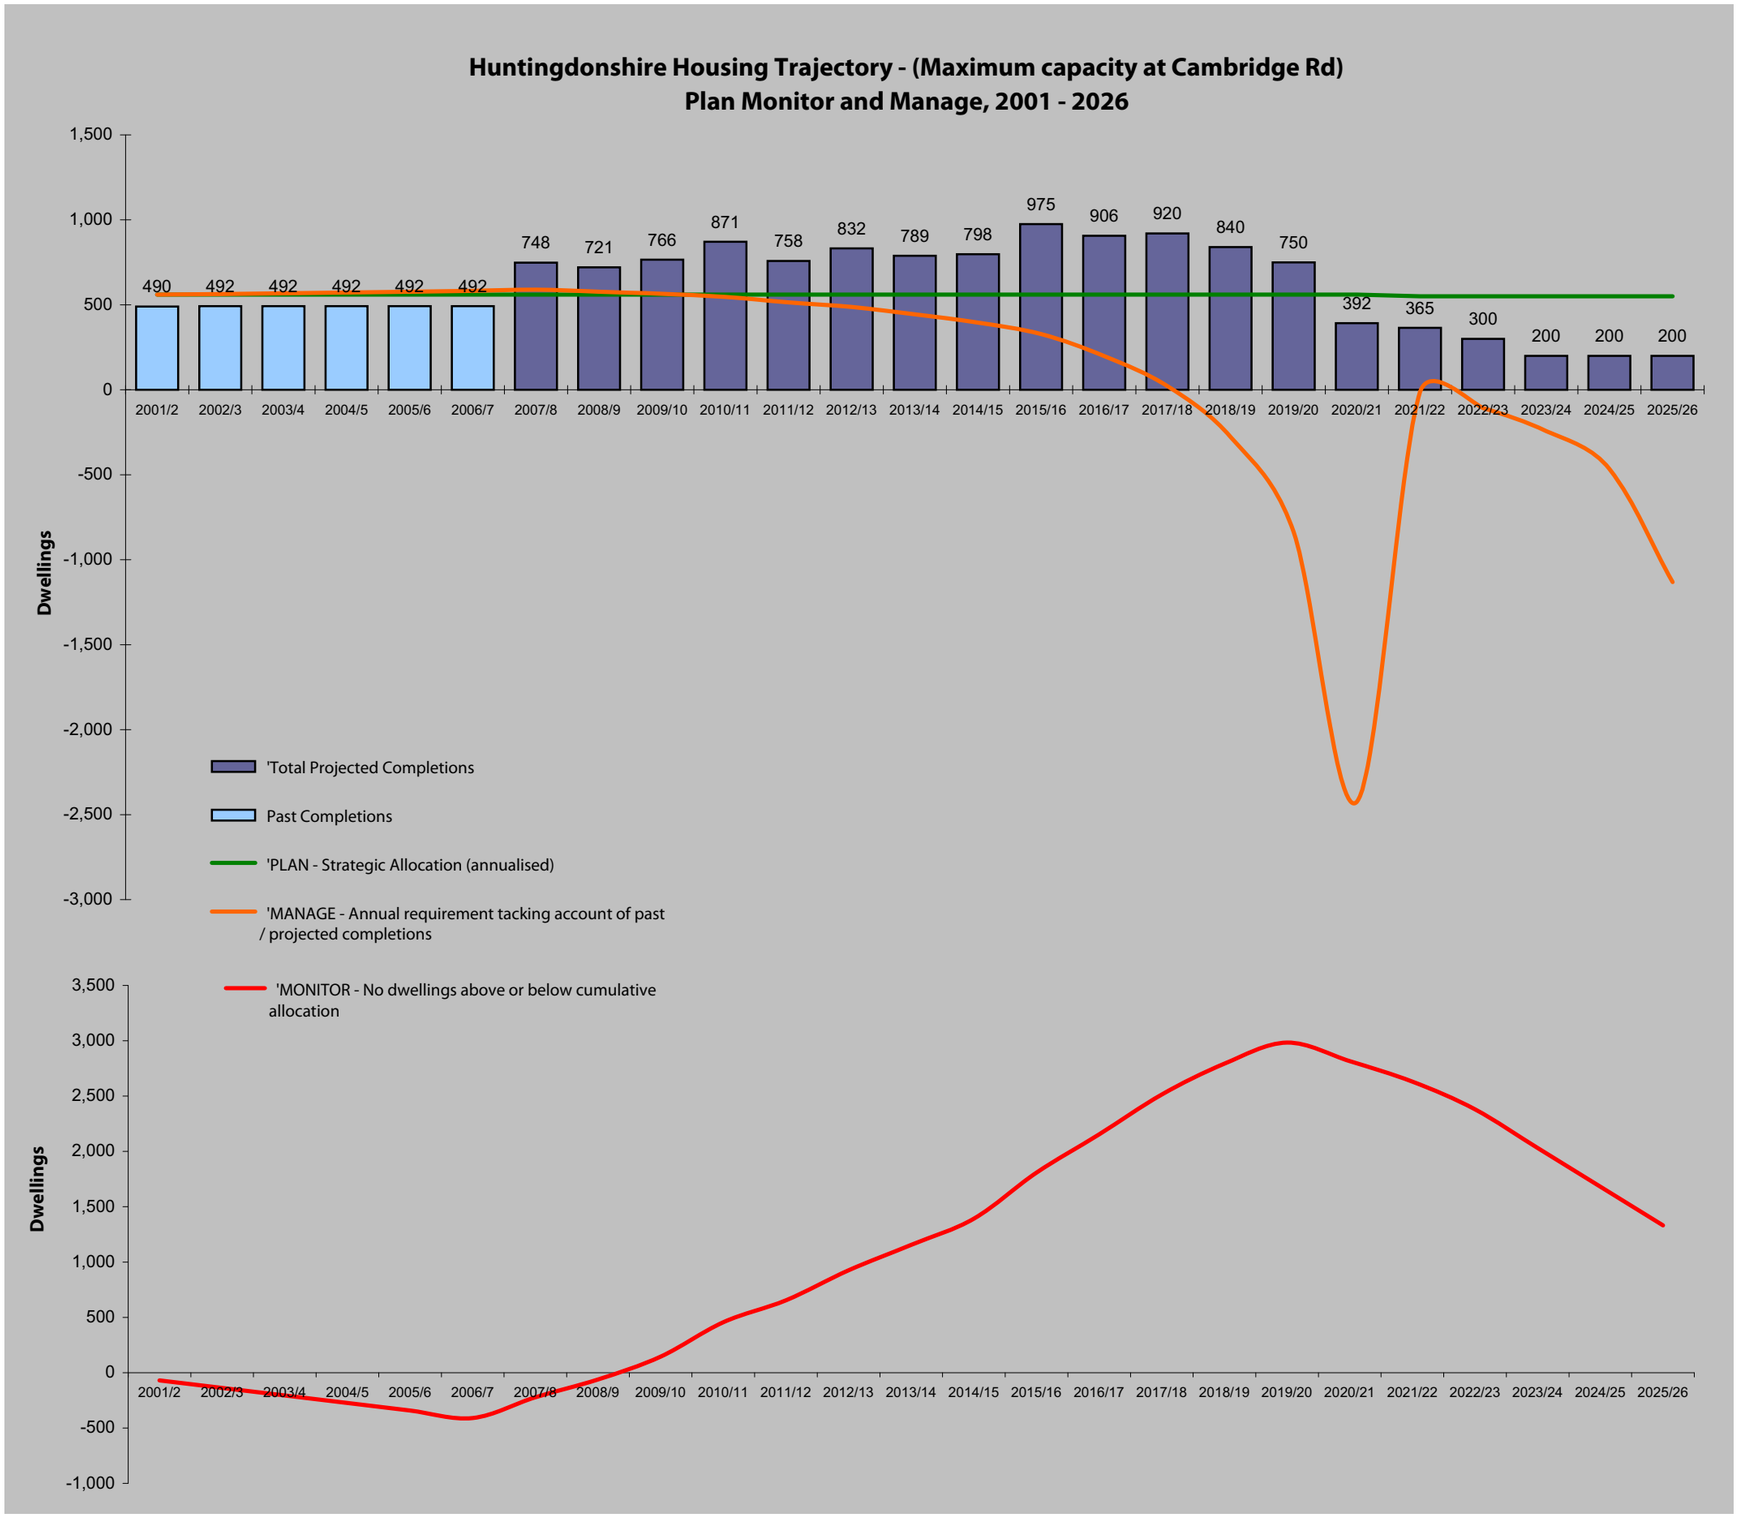
Notes:

The orange 'Manage' line indicates the annual requirements comparing the cumulative completions against the cumulative allocations. The reason this line rapidly descends into a negative position is due to the the positive scale of housing completions in Huntingdonshire in excess of the strategic allocations, with the RSS 2021 target of 11,200 units is reached by 2016.

From this point onwards towards 2021 the requirements are therefore negative. At 2021 however this shifts as the additional 2026 target of 13,950 is then taken into account.



Notes:

The orange 'Manage' line indicates the annual requirements comparing the cumulative completions against the cumulative allocations. The reason this line rapidly descends into a negative position is due to the the positive scale of housing complet

L Project - H1	Transport - Roads	A141/A1123/Main Street Junction Improvement		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhanced strategic highway capacity and safety	Faber Maunsell Transport Analysis	Not Programmed	£2,000,000	Next round of LTP		Scheme cannot be developed until AM traffic modelling north of Huntingdon is corrected and a PM model is created	G&T Costs calculation - Construction costs only. No land or utilities included. Estimate taken from Google maps and conversation with Nicholas Anderson (FM).
Bus												
L Project - H2	Transport - Bus	Completion of Huntingdon & Godmanchester Transport Strategy Schemes		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Improved public transport	Faber Maunsell Transport Analysis	2011	£2,305,000	LTP		LTP schemes funded by monies from Cambridgeshire CC, Huntingdonshire DC and Developers. Level of developer funding secured unknown.	G&T Costs calculation - Taken from Local Transport Strategy and S.Bell email 3/9/08. Total cost made up of £265,000+ £140,000 + £1,900,000.
Rail												
None	Transport - Rail											
Walking & Cycling												
L Project - H3	Transport - Walking & Cycling	Completion of Huntingdon & Godmanchester Transport Strategy Schemes		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhance the physical integration of bus/train/cycle/pedestrian services (including provision for people with mobility issues)	Faber Maunsell Transport Analysis	2011	£1,336,000	LTP			G&T Costs calculation - Taken from transport strategy and S.Bell email 3/9/08
L Project - H4	Transport - Walking & Cycling	Footway and cycleway connections to G8 site, Godmanchester		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhance the physical integration of bus/train/cycle/pedestrian services (including provision for people with mobility issues)	Faber Maunsell Transport Analysis	Unknown	£500,000	Will be developer funded			G&T Costs calculation - 20m footpath and a 25m footbridge. Construction costs only. No land or utilities included. Estimate taken from Google maps and conversation with Nicholas Anderson
UTILITIES												
Water and Sewage												
L Project - H5	Utilities - Water & Sewage	New Strategic Sewer		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with AW	Assume funding 2014, completion c 2018	£400,000	AW	AW	Capacity in existing network is constrained. Possible need for new sewer. Assume need confirmed in PR14	'FM research of costs,
Flood Risk / Protection												
None	Utilities - Flood Risk / Protection											
Electricity												
L Project - H6	Utilities - Electricity	Reinforcement of Grid at Eaton Socon		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with EDF	due to be completed by 2013	£10,000,000	EDF	EDF	Reinforcement of the Grid is being undertaken at Eaton Socon, along with additional circuits, to provide increased capacity and reliability of supply to Huntingdon and St Ives. It is anticipated that this reinforcement will be in place	'FM research of costs,
L Project - H7	Utilities - Electricity	Godmanchester general works		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with EDF	Assume funding 2014, completion 2020	£3,500,000	EDF	EDF	Godmanchester – likely to require c£3 - 4M of improvements	'FM research of costs,
Gas												
L Project - H8	Utilities - Gas	Mains Reinforcement		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with National Grid Gas	Assume funding deferred	£7,500,000	National Grid Gas	National Grid Gas	Assume gas supply to development is limited to available capacity	'G&T Costs calculation - Say 10km high pressure
GREEN INFRASTRUCTURE												
Green Corridor Projects												
None	Green Infrastructure - Green Corridors											
Major Green Infrastructure Sites and Initiatives												
L Project - H9	Green Infrastructure - Major Sites	North West of Huntingdonshire: Strategic Open Space Project(CCC GIS Proj T)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	(Green Infrastructure Strategy, Cambridgeshire County Council)	2006 to 2008	£2,000,000		HDC, Developers, Forestry Commission		'G&T Costs calculation - Notional provision
ECONOMIC/REGENERATION												
L Project - H11	Economic & Regeneration	West of Huntingdon High Tech Manufacturing Campus (Short Term Priority)		Appropriate business infrastructure to support sustainable growth of the economy and reduce out commuting	Ensure land, premises and infrastructure are available for the development of key sectors to support economic growth, including Advanced Manufacturing, Environmental Technologies,	Corrine Garbett - HDC	2008/09 – 2009/10 2008/09 to 20011/12	£100,000	EEDA/ Huntingdonshire DC	HDC	Study to: • Prepare the investment case, intervention programme and master plan for a high tech manufacturing campus as an effective economic generator for the	EDAW research of Costs with HDC
L Project - H12	Economic & Regeneration	Development East of Sapley Square, Oxmoor		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	Corrine Garbett - HDC	2008/09 to 2011/12	£3,600,000	Community Asset Programme/ EEDA	Luminus and HDC	Feasibility study, master plan, developer selection and economic intervention programme for a mixed use development including housing, community managed work space for social enterprises and relocation of existing	G&T Costs calculation - Assumed community facilities totalling 2000m2 @ £1800m2
FE / HE EDUCATION												
L Project - H13	FE / HE Education	Hinchingbrooke Business & Community campus (including access)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training needs	(Cambridgeshire Forward - POD Project Details October 2007)	2009 to 2011	£6,500,000			Essential infrastructure to enable access to new development sites for Tertiary education to serve growing District; for high tech manufacturing and business development. Business development centre and serviced office / development	G&T Costs calculation - No information say 3000m2. Construction only based on benchmarking information.
LOCAL SOCIAL INFRASTRUCTURE												
L Project - H14	Local Social Infrastructure	'Construct co-located facility that contains one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2011	£1,800,000				G&T Costs calculation
L Project - H15	Local Social Infrastructure	'Construct co-located facility that contains one 2FE Primary School, one 5GP Primary Care Centre, one Safer Neighbourhood Team Accomodation and one 52-place Nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£11,600,000				G&T Costs calculation
L Project - H16	Local Social Infrastructure	Construct one 4FE Secondary School one 1FE Primary School and one Children's Centre.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£17,000,000				G&T Costs calculation
L Project - H17	Local Social Infrastructure	Construct one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£1,050,000				G&T Costs calculation
L Project - H19	Local Social Infrastructure	Construct One 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£1,050,000				G&T Costs calculation
L Project - H20	Local Social Infrastructure	Extend Huntingdon Leisure Centre, if appropriate.(3 courts and 2 swimming pool lanes)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2016 - 2021	£2,700,000				G&T Costs calculation
L Project - H21	Local Social Infrastructure	Construct co-located facility that contains one 2FE Primary School, one Small Community Centre, one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£7,350,000				G&T Costs calculation
L Project - H22	Local Social Infrastructure	Construct co-located facility that contains one Small Community Centre, one Safer Neighbourhood Team Accomodation and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£2,350,000				G&T Costs calculation
L Project - H24	Local Social Infrastructure	Construct One 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2021 - 2026	£1,050,000				G&T Costs calculation
L Project - H25	Local Social Infrastructure	Outdoor sports, pitches, courts and greens (ha.)	15 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£3,000,000				G&T Costs calculation
L Project - H26	Local Social Infrastructure	Allotments and community gardens (ha.)	3 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£750,000				G&T Costs calculation
L Project - H27	Local Social Infrastructure	Informal open space (ha.):	16.8 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£8,970,000				G&T Costs calculation
L Project - H28	Local Social Infrastructure	Children and young people's play space (ha.)	2.4 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£3,120,000				G&T Costs calculation

The facility should leave space to accomodate project 5 below		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£2,550,000				G&T Costs calculation
L Project - SI9	Local Social Infrastructure	Extend project 4 above to also include one Primary and Social Care Facility and one small community centre (300sq.m). The Primary and Social Care facility should include 2 new GPs amalgamated with one or more existing surgery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities or Provide appropriate health and social care infrastructure	EDAW Analysis	2016 - 2021	£1,850,000				G&T Costs calculation
L Project - SI10	Local Social Infrastructure	Extend one or more of Wheatfields School, Westfield School and Thorndown Schools by a total of 110 primary places		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£2,050,000				G&T Costs calculation
L Project - SI11	Local Social Infrastructure	Further Extend St Ivo Secondary School by 100 places (now 300 extra)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£1,450,000				G&T Costs calculation
L Project - SI12	Local Social Infrastructure	Extend St Ives Outdoor Leisure Complex		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2016 - 2021	£260,000				G&T Costs calculation
L Project - SI13	Local Social Infrastructure	Outdoor sports, pitches, courts and greens (ha.)	5.0 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£1,000,000				G&T Costs calculation
L Project - SI14	Local Social Infrastructure	Allotments and community gardens (ha.)	1.0 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£250,000				G&T Costs calculation
L Project - SI15	Local Social Infrastructure	Informal open space (ha.):	5.6 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£2,990,000				G&T Costs calculation
L Project - SI16	Local Social Infrastructure	Children and young people's play space (ha.)	0.8 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£1,040,000				G&T Costs calculation

AREA 5- ST NEOTS LOCAL AREA SPECIFIC												
TRANSPORT												
Roads												
L Project - SN1	Transport - Roads	A428/Cambridge Road Junction Improvement		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhanced strategic highway capacity and safety	Faber Maunsell Transport Analysis	Not Programmed	£2,000,000	Developer funded from land south of Cambridge Road		Scheme cannot be developed until St Neots Traffic Model is completed	G&T Costs calculation - Construction costs only. No land or utilities included. Estimate taken from Google maps and conversation with Nicholas Anderson (FM).
L Project - SN2	Transport - Roads	A428/Barford Road Junction Improvement		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhanced strategic highway capacity and safety	Faber Maunsell Transport Analysis	Not Programmed	£2,000,000	Developer funded from land south of Cambridge Road		Scheme cannot be developed until St Neots Traffic Model is completed	G&T Costs calculation - Construction costs only. No land or utilities included. Estimate taken from Google maps and conversation with Nicholas Anderson (FM).
L Project - SN3	Transport - Roads	St Neots Market Town Transport Strategy High Street Improvements		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhance the physical integration of bus/train/cycle/pedestrian services (including provision for people with mobility issues)	Faber Maunsell Transport Analysis	2011	£750,000	LTP		These are LTP schemes funded with LTP monies and Developer monies from Loves Farm	FM research of costs
Bus												
L Project - SN4	Transport - Bus	New Bus Service serving Love's Farm and South of Cambridge road, St Neots		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Improved public transport	Faber Maunsell Transport Analysis	Unknown	£1,800,000	Initial Developer funding		The scale of housing development to the east of the railway in St Neots would justify the provision of a new bus service connecting the sites to the town centre.	G&T Costs calculation - Assuming capital cost of green bus of 6nr @ £300k each along a route length of 10km with a bus frequency at 15 mins
Rail												
L Project - SN5	Transport - Rail	St Neots Station Improvements		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhance the physical integration of bus/train/cycle/pedestrian services (including provision for people with mobility issues)	Faber Maunsell Transport Analysis	Unknown	£3,600,000	Developer funded		£2.01M secured from Loves Farm	FM research of costs, £2.01M funding secured from Loves Farm
Walking & Cycling												
L Project - SN6	Transport - Walking & Cycling	Completion of St Neots Market Town Transport Strategy Schemes		An upgraded and managed transport network, including public transport to service existing and growing communities effectively and safety	Enhance the physical integration of bus/train/cycle/pedestrian services (including provision for people with mobility issues)	Faber Maunsell Transport Analysis	Unknown	£7,436,000	LTP			G&T Costs calculation - Taken from St. Neots Market Town Transport Strategy.
UTILITIES												
Water and Sewage												
L Project - SN7	Utilities - Water & Sewage	Increase in discharge consent for 2000 new homes		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with AW + AW discussions with EA	Consent in 2008	£1,000,000	AW	AW	Increase in discharge being sought to accommodate 2000 new homes, including those at Love's Farm	'G&T Costs calculation - Assume creation of ponds. Say 30000m3 including associated pipework
L Project - SN8	Utilities - Water & Sewage	Further increase in discharge consent for full extent of proposed growth. For cost estimate purposes only, allowance to be made for possible upgrade to WWTW		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with AW + AW discussions with EA	Assume consent in 2013, funding in 2014, completion 2018	£500,000	AW	AW	Implementation date subject to AW/EA negotiation, nature of any upgrade to the WWTW, funding approval and time to implement, which could vary from 0 to 8 years. Assume discharge consent agreed in 2014 with implementation of	'FM research of costs,
L Project - SN9	Utilities - Water & Sewage	New Strategic Sewer		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with AW	Assume funding 2014, possible phased completion 2016 to 2021	£600,000	AW	AW	Capacity in existing network to be increased to accommodate proposed growth beyond 2000 new properties. Assume need confirmed in PR14 and implementation phased.	'FM research of costs,
Flood Risk / Protection												
None	Utilities - Flood Risk / Protection											
Electricity												
L Project - SN10	Utilities - Electricity	New 10-12MW Primary SubStation		Appropriate flood risk management, sustainable water supply and sufficient provision of utilities including the development of local renewable sources of energy	Develop utility provision including ICT (Broadband capacity)	Faber Maunsell Utilities Analysis & Discussions with EDF	Assume funding 2014, completion 2018	£5,000,000	EDF	EDF	St Neots – proposed growth would require a new primary substation (10-12MW). The recent housing development to the east of the railway has taken up any 'spare' capacity. Given the 3 – 5 year timescale for implementation, this	'FM research of costs,
Gas												
None	Utilities - Gas											
GREEN INFRASTRUCTURE												
Green Corridor Projects												
L Project - SN11	Green Infrastructure - Green Corridors	St Neots Town Centre Green Space Corridor (CCC GIS Proj 1a)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	(Green Infrastructure Strategy, Cambridgeshire County Council)	2006 to 2008	£2,500,000		D'elivery led by StNTCI and HDC.		G&T Costs calculation - No info. say 10000m2. Mixture of soft and hard landscaping proposal suitable for town centres @ £250m2
L Project - SN12	Green Infrastructure - Green Corridors	Green Links of St Neots (CCC GIS Projects 22,16,30,31)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	(Green Infrastructure Strategy, Cambridgeshire County Council)	2006 to 2026	£14,000,000		CCC- Rights of Way Team	Cambridge to St Neots Green Corridor (CCC GIS Proj 16) + Godmanchester to Cambourne Corridor (CCC GIS Proj 30) +Ouse Valley to Cambourne Corridor -Additional crossing of River Ouse near Paxton Pits (CCC GIS Proj 31)	G&T Costs calculation - say 30km long x 500m. Soft landscaping only - saplings and enhanced landscaping. No mature planting + 5km x 500m. Soft landscaping only - saplings and enhanced landscaping. No mature planting + say 15km long x 500m. Soft landscaping only - saplings and enhanced landscaping. No mature planting. River crossing @ £1.5m
Major Green Infrastucture Sites and Initiatives												
L Project - SN14	Green Infrastructure - Major Sites	Land East of St Neots - (CCC GIS Proj Q)				(Green Infrastructure Strategy, Cambridgeshire County Council)	2006 to 2008	£1,000,000		HDC, Developers, Forestry Commission		'G&T Costs calculation -Notional provision
ECONOMIC/REGENERATION												
L Project - SN16	Economic & Regeneration	St Neots Green Corridor (St Neots to Little Paxton)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	Corrine Garbett - HDC	2008/09 (£90k) 2009 to 2011 (£1.1m)	£1,190,000	Phase 1: HGF £90k Phase 2: HGF Funding not yet secured	HDC	*Phase 1: Preliminary design and planning permission for green space and education facilities, extension to visitors centre at Paxton Pits, small visitor centre at Barford Road, improvements to access and improvements to visitor	EDAW research of Costs with HDC
L Project - SN17	Economic & Regeneration	St Neots Skills Campus (Introduction of carpentry, plumbing and electrical trades training to the St Neots area.		Appropriate business infrastructure to support sustainable growth of the economy and reduce out communting	Ensure land, premises and infrastructure are available for the development of key sectors to support economic growth, including Advanced Manufacturing, Environmental Technologies,	Corrine Garbett - HDC	Unknown	£350,000	EEDA £225,000 HRC £125,000	Hunts Regional College	30 jobs created/safeguarded, 20 businesses supported, 10 businesses engaged in new collaboration, 50 people assisted with skills development	EDAW research of Costs with HDC
L Project - SN18	Economic & Regeneration	St Neots Space for Creativity Enterprise Phase 2 (specifically St Mary's Urban Village/ Fire Station site).		Appropriate business infrastructure to support sustainable growth of the economy and reduce out communting	Ensure land, premises and infrastructure are available for the development of key sectors to support economic growth, including Advanced Manufacturing, Environmental Technologies,	Corrine Garbett - HDC	TBC	£2,500,000	EEDA/ Huntingdonshire DC	HDC	Developing a sub-regional cluster of managed facilities incorporating incubator units and business support/ skills development facilities for the creative industries sector. Building on the development of phase 1.	EDAW research of Costs with HDC
L Project - SN19	Economic & Regeneration	New visitor centre at Paxton Pits		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	Corrine Garbett - HDC	TBC/2017?	£2,000,000	TBC	HDC	Development of a new larger visitor facitity at Paxton Pits. After gravel extraction has been completed.	EDAW research of Costs with HDC
L Project - SN20	Economic & Regeneration	Regeneration of St Neots Town Centre - the Priory Quarter.		Enhanced market town centres that serve their surrounding area	Appropriate re-developed and new floor space to enable an improved mix of retail, leisure, commercial, cultural and public facilities	Corrine Garbett - HDC	2008/09 Timescale and cost of delivery of full scheme tba	£100,000	EEDA/ Huntingdonshire DC DCLG – CABE support.	HDC	Feasibility study, master plan, developer selection and economic intervention programme for the regeneration of the town centre through the Priory Quarter.	EDAW research of Costs with HDC

Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£4,020,000				G&T Costs calculation
L Project - SN33 (low)	Local Social Infrastructure - Low Growth Scenario	Allotments and community gardens (ha.)	4.0 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£1,000,000				G&T Costs calculation
L Project - SN34 (low)	Local Social Infrastructure - Low Growth Scenario	Informal open space (ha.):	22.4 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£12,065,000				G&T Costs calculation
L Project - SN35 (low)	Local Social Infrastructure - Low Growth Scenario	Children and young people's play space (ha.)	3.2 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£4,160,000				G&T Costs calculation
LOCAL SOCIAL INFRASTRUCTURE - High Growth Option												
L Project - SN21 (high)	Local Social Infrastructure - High Growth Scenario	Extend either Longsands School or St Neots School to accommodate 150 additional pupils (secondary)		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2006 - 2011	£2,150,000				G&T Costs calculation
L Project - SN22 (high)	Local Social Infrastructure - High Growth Scenario	One 1 FE Primary School and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2006 - 2011	£3,550,000				G&T Costs calculation
L Project - SN23 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2006 - 2011	£1,800,000				G&T Costs calculation
L Project - SN24 (high)	Local Social Infrastructure - High Growth Scenario	One-52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£1,050,000				G&T Costs calculation
L Project - SN25 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 4GP Primary and Social Care Facility, one small community centre, one Safer Neighbourhood Team Accomodation and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities or Provide appropriate health and social care infrastructure	EDAW Analysis	2011 - 2016	£5,850,000				G&T Costs calculation
L Project - SN26 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 6FE Secondary School, one 2FE Primary School, one Children's Centre and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2011 - 2016	£27,200,000				G&T Costs calculation
L Project - SN27 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 4GP Primary and Social Care Facility, one small library, one small community centre, one Safer Neighbourhood Team Accomodation and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities or Provide appropriate health and social care infrastructure	EDAW Analysis	2016 - 2021	£6,500,000				G&T Costs calculation
L Project - SN28 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one leisure Centre (4 court) with pool (4 lane), one small community centre, one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£7,620,000				G&T Costs calculation
L Project - SN29 (high)	Local Social Infrastructure - High Growth Scenario	One Artificial Turf Pitch (ATP) on the Long Sands College Site		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2016 - 2021	£580,000				G&T Costs calculation
L Project - SN30 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 2FE Primary School, one Children's Centre and one 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£7,050,000				G&T Costs calculation
L Project - SN31 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 2FE Primary School, one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2016 - 2021	£6,800,000				G&T Costs calculation
L Project - SN32 (high)	Local Social Infrastructure - High Growth Scenario	Construct co-located facility that contains one 1FE Primary School, one 52-place nursery and one Safer Neighbourhood Team Accomodation.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2021 - 2026	£4,300,000				G&T Costs calculation
L Project - SN33 (high)	Local Social Infrastructure - High Growth Scenario	One 52-place nursery.		Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	As above or Provide appropriate life-long education / learning and training facilities	EDAW Analysis	2021 - 2026	£1,050,000				G&T Costs calculation
L Project - SN34 (high)	Local Social Infrastructure - High Growth Scenario	Outdoor sports, pitches, courts and greens (ha.)	23.4 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£4,680,000				G&T Costs calculation
L Project - SN35 (high)	Local Social Infrastructure - High Growth Scenario	Allotments and community gardens (ha.)	4.6 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate cultural, leisure and community infrastructure	EDAW Analysis	2006 - 2026 (in line with housing)	£1,150,000				G&T Costs calculation
L Project - SN36 (high)	Local Social Infrastructure - High Growth Scenario	Informal open space (ha.):	26.1 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£13,975,000				G&T Costs calculation
L Project - SN37 (high)	Local Social Infrastructure - High Growth Scenario	Children and young people's play space (ha.)	3.7 ha.	Improve health, education/learning, training, community, leisure and local and strategic open space through the provision of facilities that meet current and future needs	Provide appropriate local green, recreational and open space	EDAW Analysis	2006 - 2026 (in line with housing)	£4,810,000				G&T Costs calculation

HDC Local Investment Framework - Infrastructure Delivery Model

Infrastructure Cost Analysis & Timing

Project Number	Project Type	Project Name	Project Cost	Project Timing	Approach to Phasing of Costs	Accuracy		2001/2	2002/3	2003/4	2004/5	2005/6	2006/7	2007/8	2008/9	2009/10	2010/11	2011/12	2012/13	2013/14	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Strategic Infrastructure Projects																															
District and Sub Regional																															
S Project - 1	Transport - Roads	A14 Ellington to Fen Ditton	£1,198,000,000	2015	Manually entered based on timing estimate (left)	Used Source	100%								10%	15%	15%	15%	15%	15%	15%											
S Project - 2	Transport - Roads	A1 Buckden Roundabout Improvement	£2,000,000	Not Programmed	Manually entered based on timing estimate (left)	EDAW guess timing	100%									25%	25%	25%	25%												
S Project - 16	Transport - Roads	A428 Caxton Common to A1	£300,000,000	programmed from 2016	Manually entered based on timing estimate (left)	EDAW guess timing	100%															25%	25%	25%	25%						
S Project - 3	Transport - Bus	St Ives to Huntingdon Bus Priority Measures '(Cambridgeshire Guided Busway)	£5,000,000	2009	Manually entered based on timing estimate (left)	Used Source	100%								100%																
S Project - 4	Transport - Bus	Cambridge-St Neots Transport Corridor	£4,580,000	Unknown	Manually entered based on timing estimate (left)	EDAW guess timing	100%									25%	25%	25%	25%												
S Project - 5	Green Infrastructure - Green Corridors	Fen Edge Project (CCC GIS Proj 9)	£3,750,000	2009 to 2015	Manually entered based on timing estimate (left)	Used Source	100%									14%	14%	14%	14%	14%	15%	15%									
S Project - 6	Green Infrastructure - Green Corridors	Guided Bus Route Green Corridor (cycleway / Bridleway / Sculpture trail) (CCC GIS Proj 10)	£45,000,000	2006 to 2008	Manually entered based on timing estimate (left)	Used Source	100%						33%	33%	34%																
S Project - 7	Green Infrastructure - Green Corridors	South peterborough Green Park to Great Fen Link (CCC GIS Proj 13)	£750,000	2006 to 2008	Manually entered based on timing estimate (left)	Used Source	100%						33%	33%	34%																
S Project - 9	Green Infrastructure - Green Corridors	Fen Waterways Project (CCC GIS Proj 24)	£2,000,000	2009 to 2015	Manually entered based on timing estimate (left)	Used Source	100%									14%	14%	14%	14%	14%	15%	15%									
S Project - 13	Economic & Regeneration	Great Fen Project (tourism)	£1,350,000	TBC	Manually entered based on timing estimate (left)	EDAW guess timing	100%											34%	33%	33%											
S Project - 14	Strategic Health	Hinchingbrooke Hospital - Vacating back of site	£5,000,000	March 2009	Manually entered based on timing estimate (left)	Used Source	100%									100%															
S Project - 15	Strategic Health	Hinchingbrooke Hospital - Upgrade to maternity wards	£700,000	March 2009	Manually entered based on timing estimate (left)	Used Source	100%									100%															
Local Infrastructure Projects																															
Multiple Local Areas																															
L Project - MA1	Transport - Roads	A141/Sawtry Way Junction Improvement	£1,000,000	Not Programmed	Manually entered based on timing estimate (left)	EDAW guess timing	100%											25%	25%	25%	25%										
L Project - MA2	Transport - Roads	Huntingdon West Link Road	£5,000,000	Not Programmed	Manually entered based on timing estimate (left)	EDAW guess timing	100%											25%	25%	25%	25%										
L Project - MA14	Transport - Walking & Cycling	Rural Cycleways	£2,500,000	unclear	Manually entered based on timing estimate (left)	EDAW guess timing	100%									25%	25%	25%	25%												
L Project - MA3	Green Infrastructure - Green Corridors	Ouse Valley Strategic Green Space Corridor (CCC GIS Proj 1)	£17,500,000	2009 to 2015	Manually entered based on timing estimate (left)	Used Source	100%									14%	14%	14%	14%	14%	15%	15%									
L Project - MA4	Green Infrastructure - Green Corridors	Grafham Water to Abbots Ripton Corridor (CCC GIS Proj 8)	£2,250,000	2016 to 2026	Manually entered based on timing estimate (left)	Used Source	100%																10%	10%	10%	10%	10%	10%	10%	10%	10%	10%
L Project - MA5	Green Infrastructure - Green Corridors	Huntingdon towards Peterborough Cycleway/Bridleway (CCC GIS Proj 29)	£4,000,000	2009 to 2015	Manually entered based on timing estimate (left)	Used Source	100%									14%	14%	14%	14%	14%	15%	15%									
L Project - MA6	Green Infrastructure - Major Sites	Grafham Water Ancient and Semi natural woodland Link (CCC GIS Proj D)	£4,000,000	2006 to 2008	Manually entered based on timing estimate (left)	Used Source	100%						33%	33%	34%																
L Project - MA7	Green Infrastructure - Major Sites	Great Fen Project - (CCC GIS Proj E)	£5,000,000	2006 to 2008	Manually entered based on timing estimate (left)	Used Source	100%						33%	33%	34%																
L Project - MA8	Economic & Regeneration	Fens Adventurer Programme	£3,000,000	2009/08 to 2012/13	Manually entered based on timing estimate (left)	Used Source	100%									25%	25%	25%	25%												
L Project - MA9	Economic & Regeneration	Rural skill development and enterprise generation	£1,500,000	Unknown	Manually entered based on timing estimate (left)	EDAW guess timing	100%											100%													
L Project - MA10	FE / HE Education	Huntingdon Regional College - St Neots and Huntingdon new college site developments	£26,000,000	2009 to 2011	Manually entered based on timing estimate (left)	Used Source	100%									50%	50%														
Huntingdon Projects																															
L Project - H1	Transport - Roads	A141/A1123/Main Street Junction Improvement	£2,000,000	Not Programmed	Manually entered based on timing estimate (left)	EDAW guess timing	100%										50%	50%													
L Project - H2	Transport - Bus	Completion of Huntingdon & Godmanchester Transport Strategy Schemes	£2,305,000	2011	Manually entered based on timing estimate (left)	Used Source	100%								33%	33%	34%														
L Project - H3	Transport - Walking & Cycling	Completion of Huntingdon & Godmanchester Transport Strategy Schemes	£1,336,000	2011	Manually entered based on timing estimate (left)	Used Source	100%								33%	33%	34%														
L Project - H4	Transport - Walking & Cycling	Footway and cycleway connections to Gilt site, Godmanchester	£500,000	Unknown	Manually entered based on timing estimate (left)	EDAW guess timing	100%									50%	50%														
L Project - H5	Utilities - Water & Sewage	New Strategic Sewer	£400,000	sume funding 2014, completion c 20	Manually entered based on timing estimate (left)	Used Source	100%														25%	25%	25%	25%							
L Project - H6	Utilities - Electricity	Reinforcement of Grid at Eaton Socon	£10,000,000	due to be completed by 2013	Manually entered based on timing estimate (left)	Used Source	100%										33%	33%	34%												
L Project - H7	Utilities - Electricity	Godmanchester general works	£3,500,000	ssume funding 2014, completion 202	Manually entered based on timing estimate (left)	Used Source	100%														17%	17%	17%	17%	16%	16%					
L Project - H8	Utilities - Gas	Mains Reinforcement	£7,500,000	Assume funding deferred	Manually entered based on timing estimate (left)	EDAW guess timing	100%										25%	25%	25%	25%											
L Project - H9	Green Infrastructure - Major Sites	North West of Huntingdonshire: Strategic Open Space Project(CCC GIS Proj T)	£2,000,000	2006 to 2008	Manually entered based on timing estimate (left)	Used Source	100%						33%	33%	34%																
L Project - H11	Economic & Regeneration	West of Huntingdon High Tech Manufacturing Campus (Short Term Priority)	£100,000	to 20011/12 (timescale and cost of fu	Manually entered based on timing estimate (left)	Used Source	100%								50%	50%															
L Project - H12	Economic & Regeneration	Development East of Sapley Square, Oxmoor	£3,600,000	2008/09 to 2011/12	Manually entered based on timing estimate (left)	Used Source	100%								25%	25%	25%	25%													
L Project - H13	FE / HE Education	Hinchingbrooke Business & Community campus (including access)	£6,500,000	2009 to 2011	Manually entered based on timing estimate (left)	Used Source	100%									50%	50%														
L Project - H14	Local Social Infrastructure	'Construct co-located facility that contains one 52-place nursery and one Safer Neighbourhood Team Accon	£1,800,000	2006 - 2011	Manually entered based on timing estimate (left)	Used Source	100%						20%	20%	20%	20%	20%	20%													
L Project - H15	Local Social Infrastructure	'Construct co-located facility that contains one 2FE Primary School, one 5GP Primary Care Centre, one Safer I	£11,600,000	2011 - 2016	Manually entered based on timing estimate (left)	Used Source	100%											20%	20%	20%	20%	20%									
L Project - H16	Local Social Infrastructure	Construct one 4FE Secondary School one 1FE Primary School and one Children's Centre.	£17,000,000	2011 - 2016	Manually entered based on timing estimate (left)	Used Source	100%											20%	20%	20%	20%	20%									
L Project - H17	Local Social Infrastructure	Construct one 52-place nursery.	£1,050,000	2011 - 2016	Manually entered based on timing estimate (left)	Used Source	100%											20%	20%	20%	20%	20%									
L Project - H19	Local Social Infrastructure	Construct One 52-place nursery.	£1,050,000	2016 - 2021	Manually entered based on timing estimate (left)	Used Source	100%																20%	20%	20%	20%	20%				
L Project - H20	Local Social Infrastructure	Extend Huntingdon Leisure Centre, if appropriate.(3 courts and 2 swimming pool lanes)	£2,700,000	2016 - 2021	Manually entered based on timing estimate (left)	Used Source	100%																20%	20%	20%	20%	20%
